■ Electric machinery and equipment Protection rating symbols

JIS C 0920:2003 (IEC 60529:2001)

The International Protection grade code (IP) is followed by two numbers, with the first number as the symbol to represent the protection classification for human body and solid foreign matter from a number of 0 to 6; the second number as the symbol to represent the degree of protection against permeation of water as a number from 0 to 9.

IP 			
First classification number Protection rating for humans and solid foreign matter	Code No.	Second classification number Protection rating for water	Supplementary Character
No protection	0	No protection	
It is protection against solid foreign matter (a pole, as an example) larger than 50mm or more in diameter.	1	It protects against water droplets falling vertically.	F Oil-proof type: It is not harmfully affected by contact of oil droplets or oil shavings from any direction.
It is protection against solid foreign matter (a finger, as an example) larger than 12.5 mm or more in diameter.	2	It protects against water droplets falling vertically, even if the product is tilted within a 15 degree angle.	G Oil resistant type: Oil drops and oily grease does not enter inside from any direction.
It is protection against solid foreign matter (a tool, as an example) larger than 2.5mm or more in diameter.	3	It protects against water sprayed from up to a vertical angle of 60 degrees.	
It is protection against solid foreign matter (wire, as an example) larger than 1.0 mm or more in diameter.	4	It protects against water splash from all directions.	
Dust-proof type: Although completely preventing dust intrusion is impossible, the amount of dust invasion will not hinder the predetermined operation and safety of the electronic device.	5	It protects against a water jet stream (sprayed from a nozzle in all directions).	
Dust resistant type: dust intrusion is completely prevented.	6	It protects against a powerful water-jet stream (sprayed from a nozzle in all directions).	
■ Cautionary Notes The IP rating stands for the grade of dust-proof and waterproof performance of the enclosure by itself. When using our products outdoors, be sure to refer to the product specifications for each product in order to select the appropriate installation location and mounting direction.	7	It protects against temporarily immersion in water.	
	8	It protects against applications used in diving conditions specified by the manufacturer.	

What is IPX9K?

IPX9K is the German DIN 40050 PART9 standard, defined as a protection that is regulated for high-temperature and high-pressurized water. Water is heated up to 80°C and then sprayed at a water pressure in the range of 80 to 100 BARs at 14 to 16 liters per minute towards the test object. The test object is between a distance of 100 to 150 mm from the nozzle and sprayed in all directions at 0, 30, 60, and 90 degrees; then sprayed at a horizontal angle while it is being rotated, all done for a period of 30 seconds without being affected by water penetration.

■ UL Standard

Underwriters Laboratories Inc. (UL) is a nonprofit organization established by the National Fire Insurance Company Conference, which is an association of the American fire insurance companies in the United States since 1894.

At UL, in order to safely protect human life and property from fire, theft, or other accidents, tests are conducted on materials and parts and conduct certification work to measure the safety of products through a follow-up service. The UL mark shown on the product indicates that UL has tested and evaluated the sample of the product and judged that it conforms to UL requirements.

■ CE Marking

CE marking refers to a common European law called the New Approach Directive enacted by the European Commission (EC), which requires products with essential requirements for each directive to comply with requirements for the user's health and the protection of the product's safety.

Product manufacturers and importers must conduct conformity assessments before products are launched or used within the EU borders and only products satisfying them are granted the CE markings. The EN (European Norm) standard has been issued as a criterion for evaluating that each directive is satisfied.

(Source originally quoted from the Japan Standards Association published guide for CE marking for electric, electronic and mechanical workers)

The main directives are also applied to our products.

1. Low Voltage Directive

Applicable to equipment that operates at rated voltages from 50V AC to 1000V AC and DC 75V to 1500V; in which it is required to protect the equipment from dangers caused by electricity. (Compatibility specification example: EN60598-1)

2. EMC Directive

The electromagnetic compatibility (EMC) directive is established to regulate both electromagnetic noise emissions, which adversely affects other devices, and noise immunity against electromagnetic noise emitted from other devices, in accordance with their directive. (Compatibility specification example: EN61000-6-4, EN61000-6-2)

IoT Solutions from the

Manufacturing Site

Production Line

Factory Operations

Surveillance Camera A

Surveillance Camera B

Visualize Work Progress

Work progress can easily be assessed with the LA6 series' programmable internal timer function to display progress.

LA6 Series

Reduce variation loss by visualizing work progress

■ Display remaining work time with the number of tiers.

Wirelessly Acquire Equipment Data

Attach our transmitters to existing PATLITE Signal Towers to wirelessly collect equipment data. The software can organize the collected data and improve productivity and efficiency, reduce bottlenecks, etc.

WD-Z2 Series

Use gathered data from operating equipment to generate various required graphs including Gantt charts.

HSST-3M2

Network Existing Equipment

Improve response time by converting your existing equipment to network enabled devices capable of notifying remote personnel via e-mail.

Manufacturing Site

Administration Office

Let's hurry back to the site.

I will check the situation.

Multi-function Switch for various setups

Audible Alarm SOUND SETUP

The built-in switch has four selectable settings for "Loud" (about 85dB) -> "Middle" (about 80dB) -> "Low" (about 75dB) -> "Off".

COLOR SETUP

The built-in switch can also allow a manual selection of 9 colors to be set for each tier.

A new lens design optimizes visibility.

The newly developed lens design efficiently diffuses LED light so that it is unmistakably visible, even from great distances.

The Audible Alarm has a total of 11 sounds to match various applications.

A newly developed compact loudspeaker not only can transmit a clear sound of 85 dB (at 1m), but also has added water resistance. A different alarm sound can be set up with each display pattern when in the Smart mode. (Only three of the 11 alarm patterns are selectable in the Signal Tower mode)

Use the free editing software to freely change the LA6 colors and patterns.

Upload colors and patterns to the signal tower via a USB cable.*

* The USB cable is sold separately (USB microB type with Charging/ Data Transfer capability).

Detachable Terminal Block

Equipped with 8 inputs for connecting wires or a PLC. I/O data can be recorded and stored over the network. DC power can also be supplied through the terminal block.

Conveniently connects to an existing network with PoE support.

PoE (Power over Ethernet) is a technology which lets network cables carry electrical power. PoE can bring many advantages, such as reducing costs of installing electrical cabling, by connecting it with a HUB supporting PoE, or have the flexibility of not having to be tethered to an electrical outlet.

LA6-POE Communications Protocols

SOCKET Communication

An application-level protocol called PNS (developed by PATLITE) can be used to establish connection between client and server and to control visual and audible alert functions.

HTTP (Hypertext Transfer Protocol)

HTTP commands sent through a web browser or PLC can trigger visual and audible alert functions.

Modbus TCP/UDP --remove images

Modbus, a vendor-neutral protocol, can be used to control visual and audible alert functions through a PLC.

Network Monitoring Signal Tower with MP3

NHL-3FV2 NHP-3FV2

- Audible Alarm and MP3 voice alert functions
- Built-in digital output and contact inputs
- Monitor network device status using SNMP protocol
- Able to send email alerts

Monitoring Functions

PING Monitoring

A maximum of 24 nodes is possible when monitoring critical status information. When an abnormality occurrence in the monitored equipment network isn't obtained, the detected abnormality warns the administrator promptly with light and sound.

TRAP Monitoring

With the TRAP Monitoring function, the NHL alerts administrators to any equipment abnormalities within the IP network that uses SNMP.

- It can distinguish the variable-bindings.
- Registration of 16 groups (4 nodes per group) is possible.

Application Monitoring

Monitor important background applications and signal the administrator upon any detected abnormalities.

Self-diagnosis Function

For peace of mind, manually test operation functions with the conveniently located test button.

Communication Commands

RSH

Controllable with RSH

The NHL is easily controllable by Remote Shell (RSH) commands, which is a flexible protocol.

NHL-FB / NH-FV Series

Event Occurrence: Command Execution, (Red/Amber/Green Lighting, Buzzer sounds)

RSH:

rsh 192.168.10.1 -l root alert 111001

NH-FV Series

Event Occurrence: Command Execution, (Ch10 Message Playback)

RSH:

rsh 192.168.10.1 -l patlite sound 10

SOCKET Transmission

PHN Command Compatibility

Controlled with 2 bit commands.

* Some functions are limited.

Event Occurrence: Command Execution, (Red/Amber/Green lighting, Buzzer sounds)
PHN Command: 57H, 17H

PNS Command Compatibility

* The PNS command is a unique command from PATLITE.

Control all pattern information by using the PNS commands.

NHL-FB / NH-FV Series

Event Occurrence: Command Execution, (Red/Amber/Green lighting, Buzzer sounds)

PNS Command: 58H, 58H, 53H, 00H, 00H, 06H, 01H, 01H, 01H, 00H, 00H, 01H

NH-FV Series

Event Occurrence: Command Execution, (Ch10 Message Playback)

PNS Command: 58H, 58H, 56H, 00H, 00H, 04H, 01H, 00H, 00H, 10H

example

Ideal for Factory Automation, Unique Solutions for USB Connections

Production line

With this easy-to-use and understand signal tower, you can alert and notify users about what is happening on the production lines.

The signal tower connects to a production line PC with a single USB cable. Working with a program to determine OK or not good, or situations where material is out or a button on the touch panel is pressed, you can control flashing LED units or sound the buzzer.

A software library (for Windows®) is available, enabling easy construction of programs. Even on other operating systems, possible for control based on protocol specifications.

The signal tower can be used for various purposes, such as notifying managers or warning operators.

Next Evolution of Signal Towers

Visibility

A uniform 360° Light-Emitting Design

The new LED color module features a unique interior lens construction that achieves a fuller, more uniform 360° degree light output. Light color is vibrant with more emission area for reliable indication from farther distances.

LCE-A Series (φ 40)

LR4 Series (φ 40)

More than twice the light output * Based on the φ 40 Red LED Model

The LR Series lenses distribute light more efficiently, more than doubling the luminous intensity of previous models.

Audibility

Unique, Fully-enclosed Sound Module

Inspired by the structure of a drum, the new sound module is completely enclosed. This allows the sound waves to be distributed more efficiently, producing an even, 360° sound resonance. The enclosed design also improves the resistance to water and dust.

* According to our research, December 2018

LHE Series (φ 70)

LR7 Series (φ 70)

Maximum 90dB※ output

* LR7 Series Buzzer #4 Sweep sound

The fully enclosed sound module structure produces more efficient sound, up to 90dB, at 1 meter.

[Buzzer #3] High pitch (fast alternating intermittent)
2016Hz/3012Hz

[Buzzer #4] Sweep sound
1000Hz - 4032Hz (variable)

New Sounds Heard Above the Noise

Four Audible Alarm sounds* are built into the module. Audible Alarm sound No. 3 and No. 4 are newly developed with a higher variable frequency to be heard above the noise of surrounding machinery. A sound reduction function is also built-in to reduce the buzzer volume by approximately 10dB to suit the environment.

* Four Audible Alarm Sounds

No.1:Rapid Intermittent sound No.2:Continuous sound No.3:Rapid Hi-Low
No.4:Sweep sound

LR Series Model Conversion

As of September 2017, production of legacy models have completed.

Previous product

New product

Simplicity

Durability

Reorganizing modules is effortless

Traditional stack lights typically require additional threaded shafts or tools to reconfigure light modules. The LR Series makes it easier than ever to change the number of light tiers or to add a sound module.

LED/Buzzer Unit Removal

LED Unit Attachment

Modular System Design

The fully modular allows the flexibility to change the LR to match any changes in the application. Also, in case a module is damaged, it can quickly be replaced.

Scan to see this in action

Easy assembly/disassembly

Smooth surface

The modules and body unit all line up flush, creating a smooth surface for improved water run off and easy cleaning.

Environmental Performance

The LR Series is built resistant to water and dust, carrying IP65 (NEMA Type 4X, 13*) protection ratings.

*[Type 4X] Protection against damage from corrosion, rain, foreign matter, water spray, water injection, and ice formation to the outer housing.
[Type 13] Housing for indoor use. Protection from dust, water spray, oil and non-corrosive coolant.

Explosion Proof products

Various Applications for Explosion Proof and Harsh Environments

Branch	Explosion Hazard
Power Generation Companies	● Lump Coal Dust
Woodworking Industry	● Saw Dust ● Fine Wood Chips
Metal-work Operations	● Explosive Metal Dust ● Spark-ignitable Metal Dust
Food/Beverage Industry	● Ignitable Grain Dust ● Explosive Sugar Dust
Refinery Industry	● Hydrocarbons close to their flash-points ● Oil Processing Plants
Waste Disposal Companies	● Waste-water Treatment Gases
Landfills/Civil Engineering	● Flammable Landfill Gases ● Uncontrolled Gas Emissions ● Flammable Gas from poor ventilation sources
Pharmaceutical Industry	● Alcohol Solvents ● Materials explosive when mixed
Gas Suppliers	● Natural Gas Leakage ● Natural Gas Emissions
Paint-spraying Operations	● Overspray in Spray-paint Bays ● Solvent Vapor Emissions
Recycling Operations	● Unemptied flammable gas/liquid containers ● Biodegradable Material Emitting Explosive Gases
Chemical Industry	● Flammable Gases ● Flammable Liquids ● Flammable Solids
Agriculture	● Bio-gas Production Plants ● Bio-gas Located on Farms

Horizontal Mount

Descriptions

The ST-PA Explosion Proof Signal Tower Series features 5 ultra-bright, maintenance-free LED units and contained in a flame and dust proof housing.

Features

- Housing: Aluminum alloy
- Glass: Borosilicate glass
- Terminals: Easy wiring access from bottom door
- Mounting: Upright, Wall Mount, Vertical-mount, and Horizontal Mount.
- Voltage: 24V DC, 100-240V AC are available.
- Wire core size: 0.5mm²~2.5mm², AWG20~AWG14

ST-PA-LR6 is covered by the specifications shown in the shaded areas below

Country	Area Classification	Classification of hazardous areas			Patlite Model ST-PA-LR6

Ø40mm Signal Towers

The LR-EX Signal Tower Series features up to five LED segments tightly secured together with screws to ensure compliance with certifications and to prevent tampering or loosening from continuous vibration. Each ultra-bright, maintenance free, LED unit is designed with intricately cut lenses with a double-reflection system to produce even, brilliant, light output, visible from further distances. The lenses and body structure is dust and water tight and constructed from durable polycarbonate to withstand harsh environments.

FEATURES

- Suitable for Zone 2 and Zone 22 applications
- CE compliance in accordance with ATEX
- Fully-enclosed sound module with 4 built-in sounds
- IP65 protection rating

Note 1: The sound pressure level is based on measurements under controlled conditions (voice-synthesized 1 kHz sine wave played back from a distance of 1 meter), therefore the surrounding environmental conditions and message content will result in different values for the sound pressure level.

Note 2: Even when starting two or more units simultaneously, a lag will occur during message playback.

Water and Oil Resistant LED Spot Light

The CLN-EX Series LED Spot Lights features a compact, rugged design, high intensity LEDs, and protection ratings to withstand the harshest conditions. With a 22.2mm thickness, a 820 lux output, and a 180-degree adjustable angle bracket, the CLN-EX maximizes visibility in just about any environment.

- Suitable for Zone 2 and Zone 22 applications
- CE compliance in accordance with ATEX
- 60,000 hours or about 7 years of service life
- Protection ratings: IP66G, IP67G, IP69K
- IEC62471 Compliance (Photobiological Safety Standard)
- Daylight color temperature (8,500K) suitable for detailed work
- Included angle bracket with 180-degree range of motion
- 22.2mm Thickness x 85mm Width x 126mm Height

CLN-24-CD-PT-EX

Light Distribution Characteristics

High intensity LEDs with 820 lx provides optimal illumination with only a 174mA current draw

Stainless steel, 180-degree angle bracket provides versatile installation options to illuminate your work area

Floor Mount

Wall Mount

Ceiling Mount

Angle bracket can be removed for direct mounting

Color temperature of 6,500K is ideal for detailed work areas

Natural, wide light distribution at 550 lumens; 40W bulb equivalent

Specifications

Model	CLN-24-CD-PT-EX
Color Code (Color)	CD (Daylight)
Color Temperature (typ.)	6500K
Illumination (typ.) (Centered at 24VDC) 1m	820 lx
Total Luminous Flux (typ.)	550 lm
Rated Voltage	24V DC (Polarized)
Operating Voltage Range	24V DC $\pm 10\%$
Rated Current/Power Consumption	174mA $\pm 10\%$ / 4.2W
Operating Ambient Temperature	-40°C to +60°C (90% RH, No Condensation)
Main Unit Material	Body: Aluminum Alloy, Lens: Tempered Glass
Protection Rating	IP66G/67G (JIS C 0920)/69K (DIN 40050 part 9) (excluding cable end)
Mounting Location/Direction	Indoor / Any Direction
Insulation Resistance	DC 500V 5M Ω or more
Withstand Voltage	500VAC for 1 minute (Between terminals and chassis)
Vibration Resistance	30Hz total amplitude 0.3mm ^{pp} Back and forth, up and down, right and left for 2 hours each Total amplitude 0.3mm ^{pp} (10-57Hz), Acceleration 19.6m/s ²
Mass (Tolerance $\pm 10\%$)	430g

*1 : The typical value of LED brightness is 70% of the original specification, but may vary depending on actual applications.

*2 : IP66G and IP67G are Japanese Industrial Standards (JIS C0920-2003), and IP69K is the German DIN 40050 PART9 Standard.

*3 : CLN-24-CD-PT-EX Spot Light can only be installed where risk of mechanical danger is limited to 2 Joules of impact energy

LR6-USB

LR6-3USBW-RYG
LR6-3USBK-RYG
(pre-assembled product)

LR6-USBW
LR6-USBK
(body unit)

- PC or HMI controlled
- Custom programming made easy with our free software library (.DLL)
- Open architecture makes it possible to control the device with other operating systems such as Linux
- Supports HID class. No exclusive drivers necessary
- Supports solid color, clear-globe, and 7-in-1 multi-color LED units
- IP65 protection rating - High water and dust protection

(Sold separately) (Sold separately)

Specifications

Model	LR6-3USBW-RYG LR6-3USBK-RYG (pre-assembled product)	LR6-USBW LR6-USBK (body unit)
Rated Voltage	5V DC (USB bus power)	
Operating Voltage Range	Rated voltage $\pm 5\%$ (Compliant with USB2.0 standard)	
Rated Current Consumption	Maximum	500mA
Ambient Operating Temperature	-20°C to $+50^{\circ}\text{C}$	
Ambient Operating Humidity	90% RH or less, no condensation	
Mounting Location / Direction	Indoors, Upright	
Protection Rating	IP65 (IEC 60529)/ NEMA TYPE 4X, 13*	
Mass (Tolerance: $\pm 10\%$)	320g	140g
LED unit control	Lighting, light off, pattern on (4 types)	
Audible control	Buzzer on, buzzer off, sound pattern 4 types / select from 13 pitches	
Audible sound pressure	Typ. 80dB (approximately 10dB with sound reduction) (at a distance of 1m in front of the buzzer aperture) Frequency 2349.3Hz	
Communication method	USB 2.0 Full Speed	
Software Library (DLL) supported operating systems	Windows® 7, Windows® 8 (except RT), Windows® 8.1 (except Windows® 8.1RT), Windows® 10	

* Except when using pole bracket or wall bracket.

Ideal for Factory Automation, Unique Solutions for USB Connections

Production line

An error was made

With this easy-to-use and understand signal tower, you can alert and notify users about what is happening on the production lines.

The signal tower connects to a production line PC with a single USB cable. Working with a program to notify of situations such as where an error has occurred, or when a button on the touch panel is pressed, you can control flashing LED units or sound the buzzer.

With DLL support (for Windows®), you can easily build programs.

Control is possible with other operating systems as well.

Use for a variety of purposes, such as notifying a manager.

PC, panel computer, and so on.

USB Cable

LR6-USB

Supports DLL

Production office

Visualize the production site status.

Installed on equipment

Works with PC controlled equipment, such as a printer.
Alerts for out-of-paper or other errors.

Supports both, DLL control and protocol control

By using DLLs, you can build your programs more easily. Possible for control on other operating systems based on the protocol specifications.

As it is a HID class device, it does not require a proprietary driver.

◆ LED Unit

Lighting, light off, pattern on (4 types)

◆ Buzzer

Buzzer on, buzzer off, and 4 types of sound pattern
Select 2 from 13 pitches

Compatible LED Units

LR6-E
-R/Y/G/B/C

LR6-E
-R/Z/YZ/GZ/BZ

LR6-E-MZ

- Maximum 5 LED units (LR6-E-□, LR6-E-□Z) can be installed in total.
- Cannot be used with non-compatible LED units
- Multiple LED units of the same color (LR6-E-□, LR6-E-□Z) cannot be used.
- When LR6-E-MZ is connected, cannot connect other units.
- When LR6-E-MZ is connected, there are 2 types of patterns.

Demo Software

Confirm actual operation of the LED unit and buzzer. For details, please see our website.

Supports wall mount and pole mount

We also have wallmount brackets and optional mounting poles.

Example

WD-LR-Z2

WDR-LE-Z2

WDT-6LR-Z2

WDT-5LR-Z2

LR LED Signal Tower Series compatible Transmitters (WDT) and Receiver (WDR).

The Wireless Data Acquisition System is a cost-effective, IIoT-enabled add-on for the LR Series. This system allows signal towers to wirelessly transmit equipment status changes to a host PC for real-time monitoring and data analysis. Identify production bottlenecks, enhance supervisory control, optimize productivity, and improve Overall Equipment Effectiveness (OEE) with this complete, networked solution.

Transmitter Installation

Simply twist to unlock and remove segments. The WD transmitter is then twisted on above the Signal Tower base unit. No tools necessary for installation.

How to use the WD Application Software

① When using software packages from PATLITE partners that support the WD system

You have the benefit of being able to start operations right away following installation of the WD system.

② When developing your own analysis and data acquisition applications

(1) Use generated CSV log data with Hardware System Setting Software.

(2) Without using Hardware System Setting Software, work directly with the data packets received by the transmitter on the PC or PLC.

* For details about socket communication and communication with PLCs, contact your local sales representative.

Hardware System Setting Software

Model:WDS-WIN01

Improved ease of use
by combining 3 applications

Data collection

File settings

System settings

& Also!!

Splitting files

Easy-to use interface

Language settings function

Supports WD-LR-Z2 extended format

(Recommended Operation Environment)

Windows7 (32/64bit), 8.1 (32/64bit), 10 (32/64bit),
Windows server 2012R2 (64bit), 2016 (64bit)

* Other than data collection, complimentary use of the other functions.

You can split the file according to your needs

Want to collect operation data for each machine		→	Generate CSV file for each transmitter	
Want to collect data for each line or building		→	Generate CSV file for each receiver	
Want to collect data for each work shift		→	Generate CSV file for each work shift by specifying time periods (maximum 3 shifts)	
Want to avoid increasing time for data analysis because of increased data		→	Split CSV file by file size (between 100 and 1000 KB)	

Contents of CSV file generated by Hardware System Setting Software

Updated in real time

As the equipment operation status changes, data is updated in real time. By setting up user name, you add equipment name for each transmitter.

Create a file per day

Use "Patlog_autoyyyy_mm_dd.csv" as the file name to automatically generate one file each day. (Initial settings)

Record data every second

Date/Time is determined by the PC clock data, and recorded down to the second.

Date/Time	MAC address	User name	Red information	Amber information	Green information	Blue information	White information	Buzzer information	WDT monitoring information
10/18/2017 8:10:15	58C232FFFE57811C	Device1	0	0	1	0	0	0	9
10/18/2017 9:15:35	58C232FFFE57811C	Device1	0	0	0	2	0	0	9
10/18/2017 9:30:45	58C232FFFE57811C	Device1	0	0	1	0	0	0	9

10/18/2017 10:5:30	58C232FFFE57811D	Device2	0	0	1	0	0	0	9

Standard Format

Extended Format

With the WDS-WIN01 extended function, you can automatically collect information like this.

Red, yellow, green, blue, and white signal light information

0: Light off, 1: Lighting, 2: Flashing,

Audible information*

0: OFF, 1: ON

WDT monitoring information

0: WDT is disconnected (equipment power off),
9: WDT is connected (equipment power on)

* The status is also 1.ON, when Audible and flashing COM are synchronized.

User Interface

Data collection screen*

Equipment operation status is saved to the CSV file in real time.

Setting Screen

Specify various settings such as wireless Channel and group ID for transmitter/receiver

PATLITE.

Language settings
Change the display language between English and Japanese

* To use data collection, purchasing a "WDS-WIN01" license key is required.

Function Features

Various monitoring functions supported

PING Device Monitor

Monitors Device Existence on the Network

Each NH Tower initiates PING interaction for up to 24 network devices. When a PING response fails, light/sound signaling occurs to warn administrators.

SNMP v1 · v2c

Monitor networking equipment at a low cost
Many network devices (UPS, printers, routers, switches, etc.) generate SNMP TRAP messages when a failure occurs. The NH tower can trigger light/sound signaling based on these messages to warn the administrator.

It can distinguish the various TRAPS. Register up to 16 groups (4 nodes per group).

Application Monitoring

The tower can monitor important background applications and signal the administrator upon any failure.

Self Diagnosis Function

The test switch on the front of the Body can check the Signal Tower and buzzer operation functions easily without it being controlled through the network.

Various Communication Commands

Control with HTTP Commands

You can send HTTP communication commands to control all notification patterns.

NH-FB Series / NH-FV Series
Execute command (Red, Amber, Green, Lighting, Sound Buzzer)
`http://192.168.10.1/api/control?alert=111001`
Execute command (execute clear operation)
`http://192.168.10.1/api/control?clear=1`

NH-FV Series
Execute command (Red - Lighting, Amber - Flashing 1, Playback message on ch 10 once)
`http://192.168.10.1/api/control?led=12000&sound=10`
Execute command (digital output ON)
`http://192.168.10.1/api/control?output=1`

RSH

RSH Control

It is easily controllable by RSH commands, which is a flexible protocol. Network integrated management software and event information, including various monitor tools etc., are turned into a trigger to cause lighting, flashing, and the buzzer to sound in synchronicity with the light of the Signal Tower.

NH-FB Series / NH-FV Series
Event Occurrence: Execute command (Red, Amber, Green, Lighting, Sound Buzzer)
For RSH:
`rsh 192.168.10.1 -l root alert 111001`

NH-FV Series
Event Occurrence: Execute command (Playback message on ch 10)
For RSH:
`rsh 192.168.10.1 -l patlite sound 10`

SOCKET Communication

PHN Command Compatibility

It is controllable with 2 byte commands.
* Compatible with NHE-3FB, NHC-3FB, NHM-3FB, and PHN-3FBE1.
* There are restrictions on some functions.

Event Occurrence: Execute command (Red, Amber, Green, Lighting, Sound Buzzer)
For PHN compatible commands: 0x57, 0x17

* NH-FV Series does not support sound playback using PHN compatible commands.

PNS Command Compatibility

By using PNS commands, you can control all notification patterns.
* PNS commands are the proprietary commands.

NH-FB Series / NH-FV Series
Event Occurrence: Execute command (Red, Amber, Green, Lighting, Sound Buzzer)
For PNS command: 0x58, 0x58, 0x53, 0x00, 0x00, 0x06, 0x01, 0x01, 0x01, 0x00, 0x00, 0x01

NH-FV Series
Event Occurrence: Execute command (Playback message on ch 10)
For PNS command: 58h, 58h, 56h, 00h, 00h, 04h, 01h, 00h, 00h, 10h

Detailed Alert Function Settings

Send e-mail with a maximum of eight events (selectable)

The subject name and text corresponding to a diverse event can be created. It exceeds in the complete e-mail authentication function securely.

Email transmission

SNMP v2c

Can transmit from a maximum of eight locations.

Easy setup from a web browser

The detailed setup for the Body can be accessed over a web browser to its IP address. Firmware can also be upgraded remotely.

▲ Web Settings screen

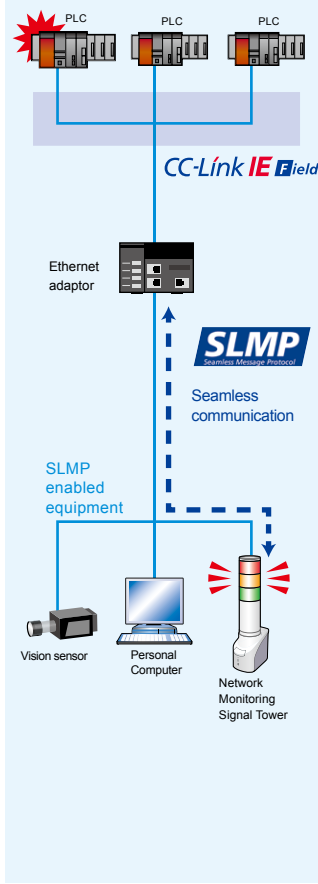

Supports DHCP

Supports DHCP client functions, such as getting network information, IP address for example, from the DHCP server.

SLMP, MC protocols supported. You can connect the unit to a CC-Link IE field network.

The unit regularly sends commands to PLCs in the CC-Link IE field network, and can notify you of retrieved data by light, sound, email, and/or trap.

Use for all sorts of cases.

Remote monitoring of server

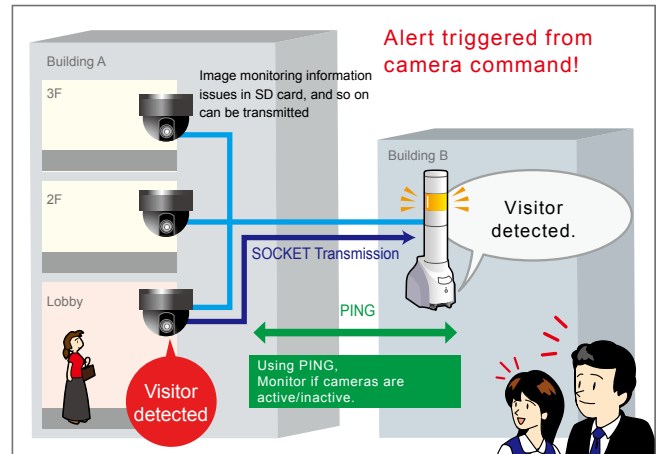

Remotely monitor the status of the server, NAS, UPS and so on. When an error occurs, a command is received via LAN, and the manager is notified as the unit works in conjunction with other equipment (contact input / output). At the same time, email notifying the problem is sent to the specified recipients.

Notification triggered by printer output

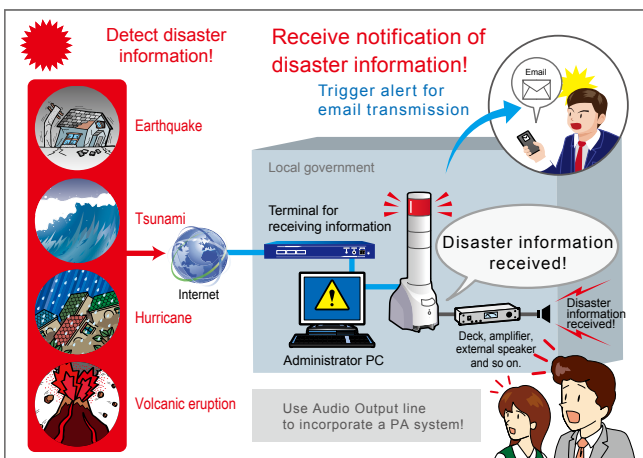

When a process starts from printer output, the person who sends the output is not necessarily the same person who receives the output. In this case, you can use the monitoring function of NH-FV to alert the status of the printer with lights and sound, so that the printout is not left unnoticed.

Notification based on information from network camera

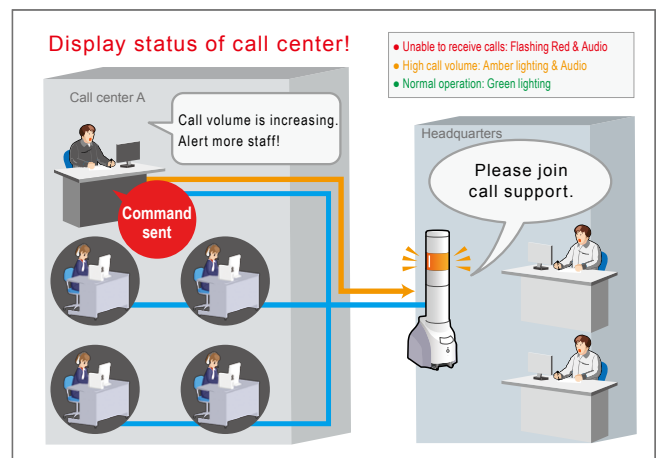

You can turn on the NH Series lights when a camera detects visitors or notify the manager to act quickly. Also, from the NH Series you can monitor if network cameras are active/inactive, ensuring stable operation of the system.

Notification disaster information

When a natural disaster alert is received, the NH Series can promptly alert you with lights and sound and notify the fire department and local government. By ensuring important information is not overlooked or left unnoticed, you can promote prompt communication with local residents.

Notification from call center

By alerting the operator's call status with signal lights, occurrences of call waiting due to call volume and an absence of operators that cause problems of getting no response can be avoided, promote follow-up by managers, and heighten awareness of operators.

■ What is PoE (Power over Ethernet)?

System that passes electric power along with data on twisted pair Ethernet cabling. This allows a single cable to provide both power and data to devices.

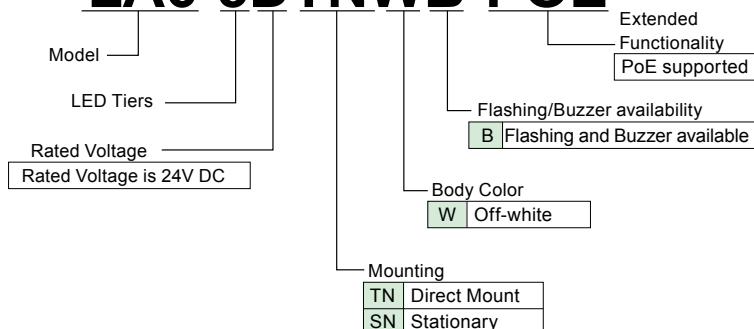

Simplify wiring with only 1 cable!

Specifications

Model	LA6-5DTNWB-POE (direct mount type)	LA6-5DSNWB-POE (stationary type)
Rated Voltage	24V DC	
Power over Ethernet (PoE)	48V DC	
Operating Voltage Range	24V DC $\pm 10\%$	
Power over Ethernet (PoE)	36 to 57V DC	
Rated Current Consumption	Standard	0.30A (at 24V DC) 0.18A (PoE: at 48V DC)
	Maximum	0.49A (at 26.4V DC) 0.26A (PoE: at 48V DC)
Rated Power Consumption	Standard	7.2W (at 24V DC) 8.6W (PoE: at 48V DC)
	Maximum	12.9W (at 26.4V DC) 12.5W (PoE: at 48V DC)
Signal Wire Current	420mA / 70mA (at 26.4V DC) 10mA (PoE: at 48V DC)	
Ambient Operating Temperature	-10 °C to +50 °C	
Ambient Operating Humidity	90% RH or less, freezing, no condensation	
Storage Ambient Temperature	-10 °C to +50 °C	
Storage Ambient Humidity	90% RH or less, freezing, no condensation	
Mounting location	Indoors	
Mounting direction	Upright	
Protection Rating	IP54 (IEC 60529)	IP20 (IEC 60529)
Environmental Conditions	Mounted in upright position	
Vibration Resistance	10 m/s ² (JIS C 60068-2-6)	None
Environmental Conditions	Mounted in upright position	-
Mass (Tolerance: $\pm 10\%$)	630g	780g
Signal Light functions	According to LA6, 5 tier, flashing, buzzer type	
Interfaces	Power Supply / Contact Input	Screwless Terminal Block (12 contacts) Wire: 0.2 to 1.5 mm ² (solid wire), AWG24 to 16 (stranded wire)
		Power Supply: 2 contacts (24V DC) Contact Input (external relay/NPN/PNP): 8 contacts Flashing/Pulse enable common line: 1 contact, COM: 1 contact
	LAN	RJ-45 connector
	PoE	IEEE802.3af Class 0
	Communication method	Ethernet (IEEE802.3)
	Physical Layer	10BASE-T/100BASE-TX (Auto-MDIX/MDIX)
	Data Link Layer	CSMA/CD
	Network Layer	IP • ARP • ICMP
	Transport Layer	TCP/UDP
	Application Layer	HTTP • DHCP • Modbus/TCP • Socket (PHN • PNS command)
Operation Unit	Setting button (in the head cover)	Setting button (in the head cover) Clear Switch
		1 (Green): Integrated in the Clear Switch *Always on when power is on
Indicator Light	None	
Various Settings	Change via Web Setup Tool	
Operation Method	Signal Wire Control/Command Control	
Supported LAN Cable	Category 5e or higher (compatible with both straight-cable and cross-cables)	
Conformity standards	RoHS Directive (EN 50581)	
	EMC Directive (EN61000-6-4, EN61000-6-2, EN55032 Class A, EN55024)	
	FCC Part15 Subpart B Class A	
	KC (KN 61000-6-4, KN 61000-6-2)	
	UL 508, CSA-22.2 No.14, Recognized Component (File No.E215660)	
	*Only for DC24V type	
References	UL 60950-1, CAN/CSA C22.2 No. UL60950-1-07 Recognized Component (File No.E480103)	
	Conforms to CE Marking

• Communication Commands

Control with HTTP Commands You can send commands via HTTP communication to control all notification patterns.

■ Detailed Motion Control (You can control tier 1 to 5 of LED unit specifying colors.)

Execute command
(Tier 1: Green, Tier 2: Blue, Tier 3: Off, Tier 4: White, Tier 5: Red, Flashing off, Buzzer: Pattern 11)
`http://192.168.10.1/api/control?color=46091&buzzer=11`

■ Smart Control Command (you can control the smart mode set up in the editing software.)

Execute command (Run smart mode group No.10)
`http://192.168.10.1/api/control?smart=10`

Network Camera

NVR

SOCKET Communication

PNS Commands supported By using PNS commands, you can control all notification patterns.

■ Detailed Motion Control (You can control tier 1 to 5 of LED unit specifying colors.)

Execute command
(Tier 1: Green, Tier 2: Blue, Tier 3: Off, Tier 4: White, Tier 5: Red, Flashing off, Buzzer: Pattern 11)
41H, 42H, 44H, 00H, 00H, 07H, 04H, 06H, 00H, 09H, 01H, 00H, 0BH

■ Smart Mode Control Command (you can control the smart mode set up in the editing software.)

Execute command (Run smart mode group No.10)
41H, 42H, 54H, 00H, 00H, 01H, 0AH

PHN compatible commands supported Control with 2-byte commands is available.

Execute command
(Tier 1: Lighting, Tier 2: Flashing, Tier 3: Off, and Buzzer: Pattern 2)
57H, 51H

* You can control lighting, flashing, and 2 types of buzzer sound patterns on tiers 1 to 3.

Modbus/TCP

You can control the signal light by sending Modbus/TCP commands, such as from a PLC.

■ Smart control command (you can control the smart mode set up in the editing software.)

Execute command
(When operating the Signal Tower in Smart Mode group number 15.)
00H, 00H, 00H, 00H, 00H, 06H, 01H, 06H, 00H, 06H, 01H, 0FH

PLC

PHE-3FB3

- Signal tower features 3 LED colors and 2 flashing patterns
- Send ASCII commands over USB or RS-232C to control built-in signal tower
- Receive power over USB or a 24V DC supply source
- 4 built-in alarm sounds with adjustable volume up to 80 dB
- Built-in "Clear" button for quickly reverting the PHC to "default state" once an alert is confirmed

* N Type only

* N Type only

Specifications

Model	PHE-3FB3-RYG / PHE-3FB3N-RYG (AC adaptor not included)	
Rated Voltage	Main Unit	24V DC, 5V DC (USB bus power)
	AC Adaptor	Input: 100-240V AC (50/60Hz), Output: 24V DC
Operating Voltage Range	90 - 264V AC (When using AC adaptor)	
Rated Power Consumption	Standby mode	1.2W (at 100V AC)
	Operating at Maximum	4.4W (at 100V AC)
Ambient Operating Temperature	0-40 degree (Celsius)	
Ambient Operating Humidity	20%-85% RH (no condensation)	
Mounting location / direction	Indoors, Upright	
Protection Rating	IP20	
Mass	545g (not including adaptor)	
Interface	USB port	Conforms to USB 2.0 (bus power support), Standard B type (female)
	Serial port	Conforms to RS-232C, D-Sub 9-pin (male)
Signal Tower *	Red, Amber, Green, Clear Lens	
Audible sound pressure	80dB or more (at a distance of 1m, in front of Main Unit)	
Accessory	AC adaptor (except N type), installation manual, rubber feet	
Supported operating systems	Windows®7 (32bit, 64bit), Windows®8 (32bit, 64bit), Windows®8.1 (32bit, 64bit), Windows®10 (32bit, 64bit), Windows Server® 2008 R2, Windows Server® 2012, Windows Server® 2012 R2	

* When operating on USB bus power, signal light is not as bright.

N: AC adaptor not included

Adjusting Buzzer Volume

- Using enclosed Sound Reduction sheet
Please attach the Sound Reduction sheet on top of the Buzzer Unit.

- Using the DIP switch in the Buzzer Unit
As shown below, please turn on the DIP switch 1 and 3 in order to reduce sound volume.

Optional Parts

Dimmer Film
NHP-TF (for NHP-FV2/FB2/PHE-3FB3)

NBM-D88NN

8 discrete input and output channels to add non-network PATLITE signaling devices to an equipment network

Email Alerts – Send emails to up to 8 addresses per alert notification

Supports SNMP, HTTP, PNS (Developed by PATLITE), Socket Transmission command protocols

Use a web browser to send commands via the Hypertext Transfer Protocol (HTTP)

Ping up to 24 nodes or devices on your network

Built-in "Clear" button for quickly reverting the NBM to its initial state once an alert is confirmed

Optional Parts

Optional Parts	Model
Server Rack Angle Mount	NBM-ANG
AC Adaptor	ADP-001

Specifications

Item	Specifications
Model	NBM-D88NN
Main Unit Rated Voltage	24V DC
AC Adaptor	Rated Voltage 100 - 240V AC (50/60Hz)
	Operating Voltage Range 90 - 264V AC (50/60Hz)
Power Consumption	14W
Operation Temperature Range	0 to 40°C (no freezing, no condensation)
Storage Temperature Range	- 20 to 65°C (no freezing)
Operation Humidity	20 - 80% RH (no condensation)
Insulation Resistance	Between current carrying metallic part and non-current carrying metallic part: 500V DC 10MΩ or more
Withstand Voltage	Between current carrying metallic part and non-current carrying metallic part: 1500V AC 10mA or less (for one minute)
Vibration Resistance	9.8m/s ²
Communication method	LAN communication
	Physical Layer: Ethernet (IEEE 802.3 compliant) 10BASE-T / 100BASE-TX (auto-negotiation) Connector type RJ-45 8-pin
	Data Link Layer: CSMA/CD method
	Network Layer: IP, ARP, ICMP
	Transport Layer: TCP, UDP
Non-Voltage Contact Output (Normally Open Contact)	Application Layer: HTTP, NTP, Socket (PHN, PNS) SMTP, SNMP (V1, V2C), DHCP, DNS, POP3, RSH
	Number of Contacts 8 points
	Contact rating Port 1-7: 125V AC, 3A/30V DC, 3A Inrush Current 5A or less Minimum current 1mA (reference value) Minimum voltage 5V DC (reference value) Port 8: 125V AC, 3A/30V DC, 3A Inrush Current 78A or less (TV-5 rating) Minimum current 10mA, Minimum voltage 5V DC
	Supported Wire Diameter Solid Wire: ϕ 0.4 - 1.2mm (AWG26-16) Stranded Wire: 0.2 - 1.25mm ² (AWG24-16)
	Wire connection method Screwless Terminal Block
Contact input (Normally Open Contact)	Input specifications D88N (NPN model)
	Supported number of input contacts Non-Voltage Contact, NPN transistor
	Number of Contacts 8 points
	Contact rating Output ON current 6mA or less per port Voltage between terminals when OFF: 24V
	Supported Wire Diameter Solid Wire: ϕ 0.4 - 1.2mm (AWG26-16) Stranded Wire: 0.2 - 1.25mm ² (AWG24-16)
	Wire connection method Screwless Terminal Block
USB (host)	USB2.0/1.1 TYPE-A 1 port for log data storage, firmware update For config data upload / download
Power output	Screw terminal block, 1 point, 24V DC \pm 10% Maximum 200mA
D-sub 9-pin	Extended Functionality
LED Display Area	Green LED 18 points (1 point for power, 1 point for status, DO 8 points, DI 8 points)
Operation	Select Switch, Reset Switch, Clear Switch, Mode Switch
Standard	EMC Directives (EN55032 (Class A), EN55024), RoHS Directive EN50581, FCC Part15 Sub part B Class A
Mounting location	Indoors
Mounting Methods	Stationary, EIA rack mount (optional part)
Mounting direction	Upright
Mass	Main Unit 1150g
	AC Adaptor 165g
Protection Rating	IP20
Accessory	AC Adaptor, Instruction Manual, 4 rubber feet
Optional Parts	Server Rack Angle Mount

Dimensions (mm)

AC Adaptor
ADP-001 (optional)

Monitoring Function

PING monitoring

Active/inactive monitoring of up to 24 nodes.

TRAP monitoring

SNMP Manager function is included.

- The unit can determine down to variable-bindings.
- You can register 16 groups (4 nodes per group).

Application Monitoring

You can run active/inactive monitoring with the application's send command. (Maximum 4 nodes)

- Server monitoring
- Printer problem detection
- Server/PC application monitoring

Command Transmission

RSH command transmission (8)

You can create RSH commands suitable for events.

SNMP, TRAP transmission (8)

You can send SNMP / TRAP suitable for events.

SOCKET Transmission

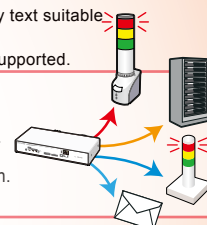

You can send commands of up to 30 bytes

Send up to 8 emails

You can create titles and body text suitable for events. POP / SMTP authentication supported.

- Control network equipment
- Event notifications to monitoring server
- Send PHN / PNS commands, and so on.

Command Control

You can control digital output with the generic protocol RSH.

PHN compatible commands supported

Control of digital output possible with 2-byte commands.

PNS commands supported

By using PNS commands, you can control digital output.

You can control digital output with HTTP commands.

Execute command (port 1: ON, port 3: OFF, Other: no operation)
http://192.168.10.1/api/control/?alert=19099999

- Server command control
- Receive PHN/PNS Commands
- Control commands from network camera

Contact Input/Output

Digital input: 8 points

Digital output: 8 points

With 8 input terminals and 8 output terminals, you can independently control various equipment that have input contacts.

The converter has one 24V output.

You can connect the converter with various notification equipment, such as Revolving Lights and audio equipment.

You can get the log from USB memory.

You can get settings from USB memory, or apply settings to USB memory.

- Contact inputs from sensors
- Contact outputs to notification equipment
- Control with contact outputs, and so on.

* PHN/PNS commands are proprietary control commands.

Condition Setting function

It can be set up with a detection condition of a digital input.

The output condition setup is combined with input signal time progression.

The output condition setup is combined with the number of input channels for a logical condition.

The output condition setup is combined with the increase of frequency signal inputs.

By setting up the operation when detection conditions are met, it can be used for various environments and applications. (Notifications according to preset temperatures, using a temperature sensor; notification of the infrared sensor, specified by area, etc.)

- The duration condition, AND condition and number condition can be set.

Available condition setting function operations

Digital Output Control	The digital output will be ON or OFF.
RSH Command Transmission	Sends the remote shell command to the device at the set address
Socket Transmission	Sends the PHN/PNS Command to the device at the set address
Trap Transmission	Sends the SNMP trap to the device at the set address
E-mail Transmission	Sends the E-mail to the set mail server.

PHC-D08N

- Send ASCII commands over USB or RS-232C to control PATLITE signaling devices
- Receive power over USB or a 24V DC supply source
- Built-in "Clear" button for quickly reverting the PHC to "default state" once an alert is confirmed

Specifications

Model	PHC-D08N (without AC adaptor)	
Operating Voltage Range	90 - 264V AC (When using AC adaptor)	
Rated Power Consumption	Standby mode	0.4W (at 100V AC)
	Operating at Maximum	16W (at 100V AC)
Ambient Operating Temperature	0-+40 degree (Celsius)	
Ambient Operating Humidity	20%-85% RH (no condensation)	
Mounting location / direction	Indoors, Upright	
Protection Rating	IP20	
Mass	370G (±10%)	
Interface	USB port	Conforms to USB 2.0 (bus power support), Standard B type (female)
	Serial port	Conforms to RS-232C, D-Sub 9-pin (male)
External Contact Output	Number of Contacts	8 points
	Contact specifications	Non-Voltage Contact Output / Normally Open Contact
Power output*	Contact rating	30V DC/3A
	Output rating	24V DC / 500mA or less
Accessory	AC adaptor (except N type), installation manual, rubber feet	
Supported operating systems	Windows®7 (32bit, 64bit), Windows®8 (32bit, 64bit), Windows®8.1 (32bit, 64bit), Windows®10 (32bit, 64bit), Windows Server® 2008 R2, Windows Server® 2012, Windows Server® 2012 R2	

* You cannot use the power output terminal when AC adaptor is disconnected. When using the power output terminal, confirm the AC adaptor is connected.

Dimensions (mm)

■ PHC-D08N

■ Wiring for RS-232C port

* RS-232C straight cable is not included in this product. Please provide your own.

Optional Parts

Optional Parts	Model
AC Adaptor	ADP-001

AC Adaptor ADP-001 (optional)

■ Communication Specifications * For details see the Instruction Manual, which you can download from our website.

Communication Data Format					
	Header	ID	Command	Data	Encoding
Transmission Data	ASCII code [HEX value]	??	See command list	Depending on the command	1 [21H]
Number of Bytes	1 byte	2 bytes	1 byte	0-8 bytes	1 byte

Command list		
Command	Number of Bytes for Data portion	Function
1 [31H]	2 bytes	Turn ON the specified output terminal.
0 [30H]	2 bytes	Turn OFF the specified output terminal.
? [3FH]	2 bytes	Changes ID.
S [53H]	8 bytes	Control each output terminal to the specified status.
G [47H]	0 bytes	Get the output terminal status.
C [43H]	0 bytes	Turn OFF all output terminals.
M [4DH]	0 bytes	Get the product information

- Commands 1 and 0 are compatible with the Personal Computer Output Relay Unit PHC-100A.
- Command S can control ON/OFF of the output terminal at the same time.

Transmission example (turning on 2, 5, and 6 on the output terminal block)

LA6

■ 24V DC model

* In Smart Mode you can use the flashing operation.

■ 100 - 240V AC model

Off-white
Flashing, buzzer type

Steel pole type
(LJ)

Colors	Signal Tower Mode: 9 colors / Smart Mode: 21 colors
Globe	Polycarbonate resin, high shock resistance and heat resistance

Ultra-bright multi-color LEDs capable of producing 21 distinct colors.
Built-in audible alarm is capable of producing 11 distinct tones.
Single part number - streamlines your supply chain.
Smart Mode allows users to create light motion patterns to more clearly define more complex equipment statuses.
USB port to locally program device.
Available in DC24V and AC100-240V (M2 type)

■ Examples

- Display duration of equipment down-time - Raise awareness to decrease non-operational time
- Display time remaining for automated equipment process - Reduce stress of workers responsible for multiple equipment
- Display takt time for an assembly line - Stabilize quality by leveling work speed
- Display the work speed for manual process lines - Raise awareness of the number of processes involved by displaying takt time
- Display remaining material by combining sensors - Assist with refills of outdoor tanks or cutting oil
- Display detailed information on the equipment status - Remotely review information shown on the operation panel

New Information Display Style

A new concept is born for the Information Display Terminal.

Previous products notified us of the status of equipment with lights and sound only. But with our new products, you can also display the equipment operation process.

As the CPU is embedded in the Main Unit, our new units do not require an external control program. By combining a maximum 21 luminous colors, 3 operating modes, and 11 buzzer sounds, you can display all kinds of information, such as time, amounts remaining, and levels.

As a result, without a large capital investment you can overcome challenges such as "managing the cycle time of equipment" and "visualizing non-operating time", which are common pain-points for manufacturing sites.

An information display terminal for the visualization age, the LA6 can solve –with your imagination– all sorts of problems.

Traditional Information Display

Display Equipment Status

Traditional information displays showed only the equipment status. There was no understanding about the equipment status provided in real time.

	Signal Tower Signal Tower	Information Signal Tower LA6
Colors	Maximum 5 Colors	Maximum 21
Color Setting	Static	Flexible
Sound	2 tones	11 tones

New Information Display

Display elapsed time until complete

You can visualize the progress, amount of material remaining, and so on, in real time. By recognizing the progress of processes and amount of various materials that remain, you can understand which equipment needs attention first, and reduce the stress of workers who are responsible for multiple equipment. You can also display the amount of time that has elapsed from when a problem occurred, allowing you to respond quickly.

■ [WJ] Direct mount, Cable model [A] AC 100 - 240V AC model

■ [WJ] Direct mount, with cable connection [D] 24V DC Type

[TN] Direct mount, Terminal block model

[WJ] Direct mount, Cable model Installation Dimension Drawings

[LJ] The following diagram shows the dimensions of the Mounting Angle included with the Steel Pole & Mounting Angle model.

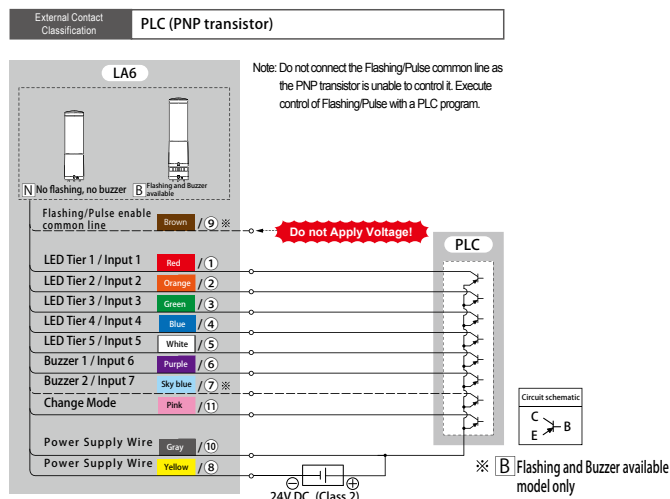

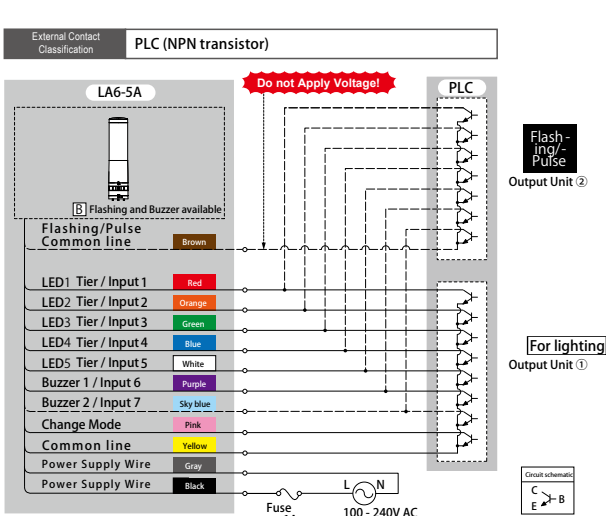

Wiring Diagram

24V DC model

100 - 240V AC model

Wiring Example / Legend		Rated Fuse Current	
LED Tier 1 / Input 1	Red / ①	250V / 1 A	
Function Name (Signal Tower Mode) / (Smart Mode)	Pin Number (ITN Direct Mount, Screw-less Terminal Block model)	5 x 20 mm Fast-blow glass tube fuse	
The color of wire (Cable model only)		Inrush Current value (cold start)	
Note: The color of the wire does not correspond to the color of the LED light.		With Ambient Operating Temperature 25°C	16 A, 2 ms
		With Ambient Operating Temperature 50°C	50 A, 2 ms

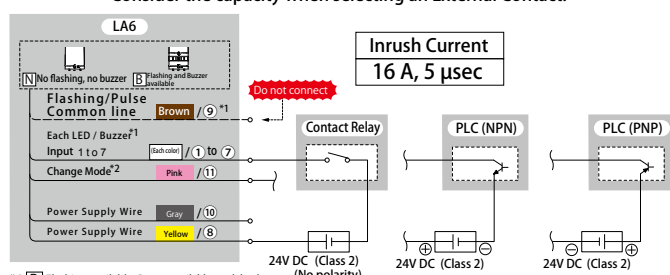

NOTICE

If you are not using a regulated power supply, use a fuse that meets or exceeds Class CC.

Signal Wire Contact Capacity	
Current Capacity	100 mA or higher
Withstand Voltage	35V DC or more
Leakage Current	0.1 mA or less
Voltage when ON (V _{sat})	1V or less

External Contact Classification: PLC or Contact Relay

CAUTION If Power Supply Wire (Gray / 10) is not connected, inrush current will flow. Consider the capacity when selecting an External Contact.

When using Smart Mode (Mode Change Pink)

	① Time Trigger Type	② Pulse Trigger Type	③ Single Display Type
Input 1 Red	Display Input (Maximum 15 binary inputs)	Display Input (Maximum 15 binary inputs)	Display Input (Maximum 31 binary inputs)
Input 2 Orange			
Input 3 Green			
Input 4 Blue			
Input 5 White	STOP	Trigger	
Input 6 Purple	Mute	Mute	Mute
Input 7 Sky blue	Clear	Clear	Clear
Switch Pink	At Input		

* For connection diagrams, please see the Instruction Manual.

Visit our LA6 product microsite to see the LA6 Series in action.

www.patlite.com/la6

Product site

* Design of the site may change without notice.

You can download "Editing Software" for free from the product site. Simplify creating and implementing your program.

Use the editing software to set up "luminous colors" and "illumination patterns".

1. Select from the top page.

2. Proceed to the software download page.

3. Download and Setup

Optional Parts

Mounting Pole: SZ-70L

Circular mounting Bracket: SZ-010

Circular mounting Bracket: SZ-016A

Wallmount Bracket: SZK-003W

Stationary installation bracket (magnetic installation):
SZW-060W
Supported type: LA6-5DTNWB-POE
LA6-5AWJWB-RYGBC

Replacement Parts

Head Cover
Off-white B31310001-7F1
Silver B31310001-9F1

USB Cover
Off-white B22100071-7F1
Silver B22100071-9F1

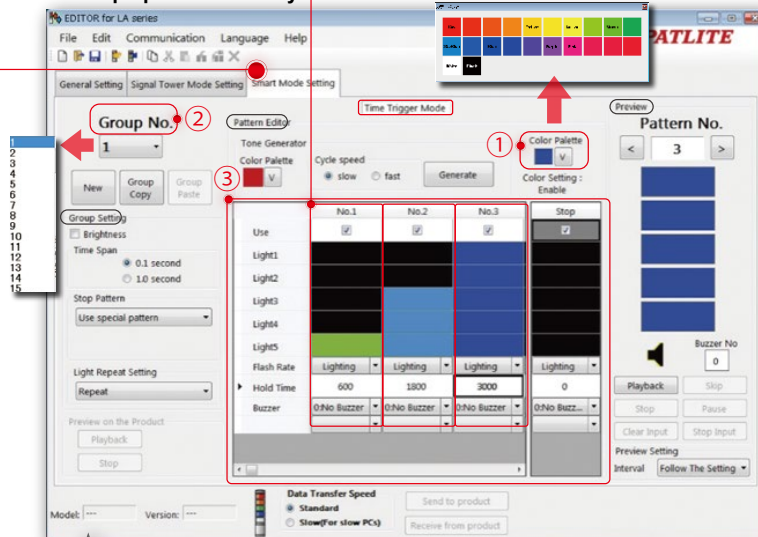

Waterproof Ring B (2 pieces)
B25110042-F1

Pole Bracket (Off-white only)
(Pole waterproof ring, screws included)
B22210134-7F1
* A waterproofing ring for the pole is available.

■ Set up operations easily

* The screen above may be different from the actual screen (displayed buttons may vary depending on usage)

① Color settings (maximum 21 colors)

Select any color from the 21 color palette.

② Group registration (maximum 15 groups*)

After setting up operations, you can register a series of operations as a group. Register a maximum 15 groups.

* You can register up to 31 groups in a Single Display Type.

③ Operation Settings (maximum 63 patterns)

Set up operations by selecting colors (21 colors), flashing frequency, illumination duration * (maximum 3,600 seconds), and buzzer sound (11 tones).

* In Signal Tower mode, you can select from 9 colors and only 3 buzzer sounds.

● Settings

- Group Settings (various detailed setup is possible)
 - * Dimmer
 - * Time span (0.1 / 1.0 seconds)
 - * Repeating Light Setting
- Generating sign patterns (9 colors)
 - * Color selection, cycle speed (slow / fast)
- Simulation
 - You can verify the luminous patterns on applications without having to send data to the actual machine.
- Transmission with actual machine
 - Not only can you send data to the machine, but you can also load data from the machine.

* Even when the machine is off, you can still send data with USB bus power only.

Smart Mode

You can specify the timing for pattern transitions with "Editing Software".

1. Time Trigger Type

Maximum Display Patterns	63 Patterns
Maximum Number of Groups	15 Groups

2. Pulse Trigger Type

Maximum Display Patterns	63 Patterns
Maximum Number of Groups	15 Groups

3. Single Display Type

Maximum Display Patterns	—
Maximum Number of Groups	31 Groups

Call and trigger by combining the ON/OFF value of inputs 1 to 5.

Signal Tower Mode

No editing software required. Set up colors using the Setting button.

Globe

Polycarbonate resin, high shock resistance and heat resistance

Next generation signal tower series featuring ultra-bright LEDs, a modular design, and a wide-selection of options to take on the most challenging applications.

Re-designed lens and improved module construction delivering bright, even light for visibility from further distances. (2000mcd output)

Re-engineered, completely enclosed sound module, maintains substantial water and dust protection while producing loud, omni-directional sound. (LR5 DC12V: 80dB LR4 & LR5: 85dB, LR6: 88dB, LR7: 90dB at 1m)

A modular, "Twist and Lock", design to easily customize and field configure LED units and sound modules.

A sleek, smooth form factor and a rugged body construction for performance in harsh environments, carrying an IP65 protection rating.

Four mounting options: Direct, pole with L-bracket, pole with circular bracket, and pole with folding bracket (Off-white only).

Available in DC24V and AC100-240V (Off-white only).

Available in Off-white and Silver bodies.

Available with Clear lens (special order).

Specifications

LR Series Assembled Products / Common Specifications

Ambient Operating Temperature	-20°C - +50°C *	
Ambient Operating Humidity	90% RH or less, no condensation	
Storage Ambient Temperature	-30°C - +60°C	
Storage Ambient Humidity	90% RH or less, no condensation	
Mounting location	Indoors	
Mounting direction	Upright	
Protection Rating	IP65 (IEC 60529) / NEMA TYPE 4X, 13 * for LJ type only, IP54	
Environmental Conditions	Upright	
Insulation Resistance	1 MΩ or more at 500V DC between the live part and non-current carrying metallic part	
Withstand Voltage	500V AC* for 1 minute, between the live part and non-current carrying metallic part. * 1500V AC for M2 type	
Flashing Rate	60±2 /minute	
Sound pressure	LR4 Typ.85dB LR5 Typ.85dB LR6 Typ.88dB LR7 p.90dB LR5 12V DC Typ.80dB With Sound Reduction: Approximately -10dB (can be switched using DIP switch)	
Environmental Conditions	With buzzer sound "No.4 Sweep sound", at a distance of 1 m from the surface in all directions	
Buzzer Sound	4 patterns *Switch using DIP switch No.1 Fast Intermitten No.2 Continuous No.3 Fast Alternating No.4 Sweep sound * By short-circuiting the buzzer line and flashing common line, you can emit a buzzer tone that turns on and off every 0.5 seconds.

*6 With LR4 and LR6 DC24V Off-white models only

*7 For LR5, LR7 models only

3 Easy Steps

1 Remove the headcover to setup the body unit

2 Attach from bottom to top, one LED unit at a time to the body unit

3 Replace the headcover, or attach the audible unit

See the Movie!!

Multi-color Wiring Diagrams

Multi-color LED Unit wire colors are **RED** / ①; **Green** / ③; **Blue** / ④. Wire colors **Orange** / ② and **White** / ⑤ are not used.

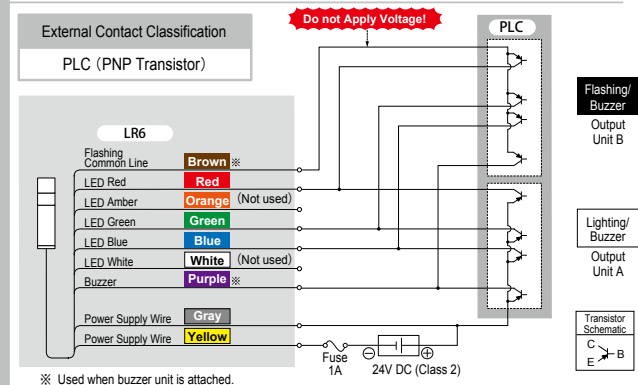

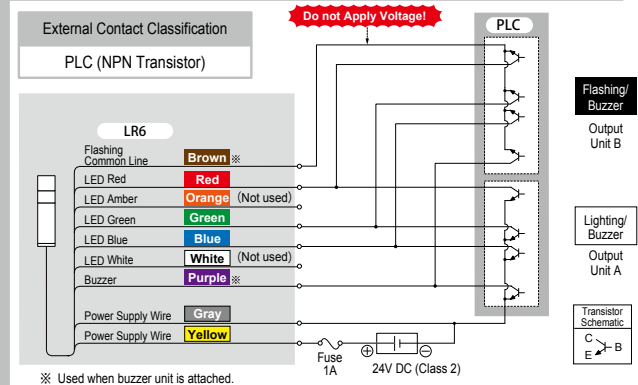

Refer to the Complete User's Manual for details.

LR6-E-MZ Lighting

LED Color	Wire Color
Red	Red
Green	Green
Blue	Blue
Amber	Red + Green
Purple	Red + Blue
Cyan	Green + Blue
White	Red + Green + Blue

Lighting / Flashing / Buzzer (LR6-E-MZ)

Product Specifications **02** 24V DC

Point

- When flashing the LR6-E-MZ simultaneously with the LR6-E-R(Z)/Y(Z)/G(Z)/B(Z)/C, the flashing cycle of the LR6-E-MZ may shift from the other LED units.

[WT],[KT] Terminal Type

Wiring Method

Terminal Block Array

9	Black	Power (Signal)
8	Grey	Flashing Common
7	Yellow	Power (Common)
6	Grey	Buzzer
5	White	LED White
4	Blue	LED Blue
3	Green	LED Green
2	Orange	LED Yellow
1	Red	LED Red

Recommended lead wire specification

Wire Type	Wire (Solid)	Wire (Frayed)
UL1007 / UL1430	0.14 - 1.5mm	AWG30 - 14

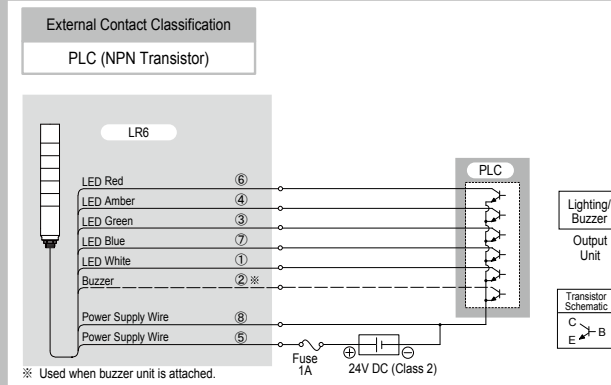

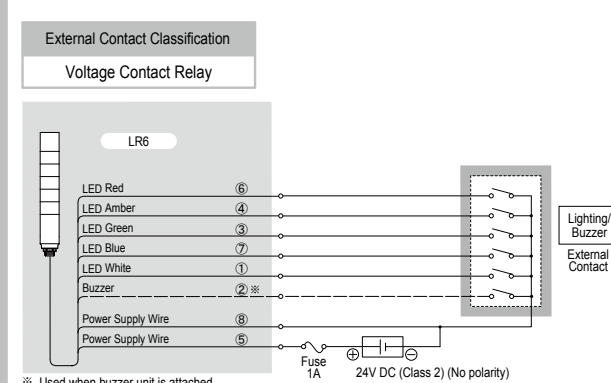

- Temperature rating should be above 75°C, and the conductor material should be of copper wire.

M12 (LR6-WC)Wiring Diagrams

Wiring Example Index	LED Red ⑥
Function Name	PIN No. (WC) Direct Mount with M12 Connector)

Lighting / Buzzer (LR6-WC)

Product Specifications **02 WC** 24V DC

Point

- The flashing function cannot be used.

M12 Connector Pin Layout

Point

- It is recommended to use the M12 Connector Cable (Optional Part) for wiring.

- MP-C M12 Connector

M12 Connector
Pin Layout

Easy to add and remove

- When adding or removing modules, the center shaft that matches the amount of tiers has to be purchased.

Interchangeable LED Modules

Changeable color sequence: Easy to add/ remove up to 3 colored modules even after installation.
Note: LED modules of the same color within a signal tower will light up simultaneously.

Wiring doesn't change

- The LED Module colors correspond to the wiring, so re-wiring is not necessary.

Optional Parts

For details, see pages 182 to 187.

Model	Rated Voltage	Sound Level	Power Consumption
MP-B	24V AC/DC	80dB (at 1m)	0.7W

- Double-insulation for enhanced durability and safety
- Direct mount installation with just a single screw
- Main body made of heat resistant ABS resin for superior impact resistance
- Compatible with the MP and MPS Signal Tower (The Red module is required when using the optional MP-B)
- Operates in conjunction with the Red LED module (Alarm activation with other colors must be special ordered).

Wiring Diagram

[LGE-□□□(FB) model]

- For FB models, avoid simultaneous Lighting and Flashing inputs to a tier from an external contact as it may illuminate other tiers.
- Please note that the FB model requires 2 common signal lines on the PC output unit, for lighting and flashing.
- Do not connect the buzzer line to the Flashing COM. Otherwise the sound will not be intermittent and the tone quality will be poor.
- For safety, please make sure you have an external protective fuse in place.
- For Signal Light wiring, Lighting signal takes precedence over Flashing.

■ Signal Wire Voltage and Current per tier

Voltage	Signal Wire Voltage	LGE model		
		LED	Buzzer	
		Signal Wire Current	Signal Wire Current	Inrush Current
24V AC/DC	24V AC/DC	90mA	20mA	250mA
100V AC	24V AC			
220V AC				

* Set aside ample capacity for the external contact, considering the Signal Wire Current and Inrush Current.

Colors Red, Amber, Green, Blue, White

Globe Polycarbonate resin with superb shock resistance and heat resistance.

The NE Series features a compact design with long-life, zero maintenance LEDs. The NE signal lights are easy to install and carries an IP65 rating with high vibration resistance for operation in wet environments.

- Unique lens cut for enhanced visibility from all angles
- Built-in terminal block for easy wiring
- Very low power consumption
- IP65 rating - dust and water resistant

Specifications

Model	Rated Voltage	Power consumption (maximum)	Operating Temperature Range	Mounting location	Protection Rating	Mass

NE-M1-CL7

Colors Red, Amber, Green, Blue, Aqua, Purple, White

Globe Polycarbonate resin with superb shock resistance and heat resistance.

The NE-CL7 Series features a compact design with multi-color, 7 color LEDs. The NE-CL7 signal lights is easy to install and carries an IP66, and 67 ratings with high vibration resistance, ideal for sanitary cleaning applications.

- Clear, frosted lens for reducing false indication and even light distribution
- Very low power consumption
- IP66, 67 rating - dust and water resistant
- Jacketed-cable line out

WHB-A model
Round Globe

(Product with a buzzer is IP23) (24V only)

Specifications

Colors	Red, Amber, Green, Blue
Globe	Polycarbonate resin with superb shock resistance and heat resistance
Body	ABS resin

The WH Series features an 100mm diameter, side wall-mount design, built-in 90dB audible alarm, and automobile incandescent bulbs as a light source for high vibration resistance.

- Automobile incandescent bulbs for high vibration resistance
- Built-in 90dB audible alarm
- Built-in terminal block for easy wiring
- IP54 rating for dust and water resistance
- Available colors: Amber, Blue

Dimensions (mm)

Wiring Diagram

KJ/KJB type (100V AC, 220V AC)
Revolving light side

*Buzzer wire goes out to multiple tiers.

*Only 1 buzzer sound. (continuous beep sound)

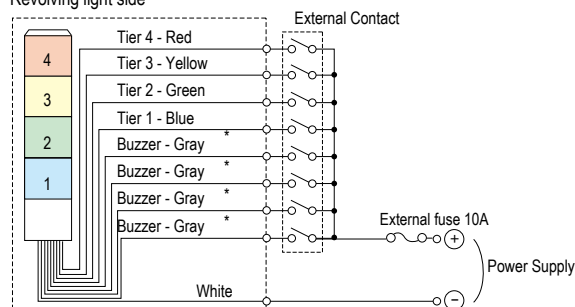

*Customer cannot increase/decrease tiers.

*KJ does not have a buzzer (Gray) wire.

*When finished wiring, please be sure to insulate the tip of the unused wire with insulation tape.

*KJ single-tier type (100V AC, 220V AC) has driving power supply. (Has power supply wire only; no signal wire)

KJ/KJB type (24V DC)
Revolving light side

■ Signal wire current and contact capacity per tier

Voltage	Signal Wire Current	Inrush Current	External Contact Capacity	Buzzer wire current	Buzzer inrush current
24V DC	450mA	4.5A	50mA or more	Current 30mA	Inrush current 0.3A
AC100V/AC220V					

Nominal Cross-sectional Area : Wire Type : Wire Length

24V DC power supply wire 0.5mm² : UL1430 : 300mm

100V AC 0.75mm² : VCTF : 280mm

220V AC power wire 0.75mm² : VCTF : 280mm

Signal wire 0.3mm² : UL1430 : 300mm

[Use of Copyrighted Material]

PATLITE Corporation has not applied for permission to use certain copyrighted music or songs recorded for Type-A, Type-C and Type-D melody charts outside of Japan. Therefore, please contact the local copyright association for permission before using the product in case this product is used outside of Japan. Melody chart Type-E is recommended for use outside of Japan as this playlist does not include copyrighted music or songs, and permission is not required.

BM type <standard type>
 BM-H type <maximum volume type>
 BM-D type <Splash resistant type>

D type only

The BM Series features a compact design with a 30mm diameter speaker, comes loaded with 2 distinct tones with a 90dB sound output.

- Ultra-small, lightweight, audible with up to 90dB sound output
- 2 built-in sound tones to suitable for emergency alarms
- Up to 90dB sound output at 1m
- Designed for indoor mounting on a wall up to 7mm thick
- Can be operated by switching on/off power to the unit
- NPN/PNP types

Channel	Channel 1	Channel 2
Tone	Intermittent Buzzer	Continuous Buzzer

Open with a ϕ 30.5mm hole if the tab is not necessary.

BSV-L

Simple message registration with various tools

The BSV-L Series features programmable voice signaling, an ultra-thin design and up to 520 seconds playback time with a 87dB sound output.

- Ultra-thin 19.9mm profile
- Maximum total playback time of 520 seconds
- Manual volume control located on back of unit and can also be adjusted by input signal
- IP54 rating for dust and water resistance
- NPN/PNP compatible

Synthetic sound

Full scale

☐ Panel mounting

☐ Wall mounting

Standard equipped with an SD card slot. Able to rewrite mp3 data on an SD card. In addition to rewriting data using existing dedicated application software, this system is able to rewrite data just by changing the file name of mp3 data without having to use dedicated software.

Compatible with multilingual voice guidance

- ☐ Scenario: Commercial facility, public facility, transportation facility, tourist site
- ☐ Application: facility guidance, event guidance, evacuation order, exhibit explanation

4 times the playback time for playback in 4 languages

With service enhancements based on multilingual support at commercial facilities, transportation facilities, and tourist sites on the rise, providing the voice guidance in the 4 languages of Japanese, English, Chinese, and Korean will require about 4 times the one language playback time. The BSV-L type enables a maximum 520 seconds playback, so easily ensures capacity for multilingual messages.

Many different messages in a single unit

- ☐ Scenario: Public washroom, elevator, escalator
- ☐ Application: guidance on usage of facilities

Support facility use with voice guidance

Support elderly and disabled users by providing voice guidance to enable them to use the facilities with ease. For example, at the entrance to public washrooms you can use the speaker to provide location and information of the multipurpose washrooms.

Specification

Model	Corresponding Transistor	Rated Voltage	Operating Voltage Range	Maximum Power Consumption	Sound Pressure Level	Operating Temperature Range	Maximum Seconds of Playback	Playback Channel	Protection Rating	Mass	Color of Body Front Cover	Registered Data
BSV-24NLM	NPN transistor	12-24V DC	10.8 - 26.4V DC	3.5W	Maximum 87dB (at 1m) 1kHz sine wave playback	-10°C - +50°C (humidity 85% or less)	520 s	4 (bit input) 15 (binary input) *3 (bit input) and 7 (binary input) when used with sound reduction feature. Synthetic sound

Full scale

☐ Panel mounting

☐ Wall mounting

Standard equipped with an SD card slot. Able to rewrite mp3 data on an SD card.
In addition to rewriting data using existing dedicated application software, this system is able to rewrite data just by changing the file name of mp3 data without having to use dedicated software.

☐ Plays maximum 15 messages (BSV-M type)

☐ 15 built-in standard alarm sounds (BSV type)

Contains 15 standard alarm sounds.

No.1	Chime	No.2	Beep	No.3	Stutter	No.4	Bell	No.5	Yelp
No.6	Rapid Hi-Lo	No.7	Melody Chime	No.8	Synthesized Piano	No.9	Synthesized Bell	No.10	Stutter & Bell
No.11	Synthesized Melody	No.12	Call Sign	No.13	Inverted Reveille x3	No.14	Galactic Motor	No.15	Two Tone

*All standard alarm sounds and mp3 data in the main unit memory is deleted when rewriting a message.

☐ Multicolored operation mode

Variety of 8 operation modes.

Operating Mode					
A	Bit input and normal playback	C	Bit input and hold playback	E	Binary input and normal playback
B	Playback prioritizing bit input and subsequent input	D	Bit input and memory playback	F	Playback prioritizing binary input and subsequent input
				G	Binary input and hold playback
				H	Binary input and memory playback

*Changing operation modes requires an SD card (SDV-2GP sold separately). Operation is not guaranteed when using other types of SD cards.

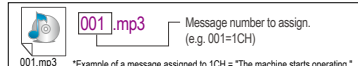

*While initial registered alarm data includes 15 sounds, operation mode must be changed to binary input when using all of them.

☐ Data rewriting method without the dedicated application.

STEP-1 Create a data file on a PC.

*Prepare in advance the message data (mp3 format) to assign to each channel.

A. MP3 data

B. Operation mode settings file (txt format data)

STEP-2

Transfer data to SD card

STEP-3

Insert SD card into BSV type unit

The machine starts operating.

① Assign messages by channel ② Set operation mode ③ Able to set sound pressure to reduce volume

Using the special application software enables additional features, such as produce a combination of messages and make individual volume adjustments.

*Signal wire CH4 (Light green) is used for the sound reduction feature. When the feature is used, the number of playback messages is 3 channels (for bit input) and 7 channels (for binary input).

Speaker

□BSV shaped speakers are also available in the lineup.

We have also added BSV shaped speakers to the lineup, which you can use for purposes that do not require synthesized sounds.

With an IP54 (forward-mounted front only, when panel mounted) the compact speakers do not take much space to install.

Use of Copyrighted Material

PATLITE Corporation has not applied for permission to use certain copyrighted music or songs recorded for Type-A, Type-C and Type-D melody charts outside of Japan. Therefore, please contact the local copyright association for permission before using the product in case this product is used outside of Japan.

Melody chart Type-E is recommended for use outside of Japan as this playlist does not include copyrighted music or songs, and permission is not required.

- Bit input → plays 8 sounds (see instruction manual for 8 sound grouping) Binary input → plays 32 sounds
- Alarm tones are denoted in characters for convenience' sake. Please inquire about actual tones or check our website for more details.

Specification

Colors not listed in stock products, and any products other than stock products are made-to-order.

Model	Rated Voltage	Operating Voltage Range	Maximum Power Consumption	Sound Pressure Level	Operating Temperature Range	Playback Channel	Protection Rating	Mass
BK-24A-J/-K	12-24V DC	10.8 - 26.4V DC	12W	Maximum 95 dB (at 1m)*	-20°C to +50°C (humidity 85% or less)	Bit input: 8 Binary input: 32	IP54 (Mount on forward-facing panel) Front only	0.35kg
BK-24C-J								0.53kg
BK-24E-J								0.53kg

Options

BKV

-J (Light gray)

-K (Dark gray)

The BKV Series features programmable voice signaling, an embedded mounting design, and a sound output of 95dB.

- Front switch and volume control access
- Comes pre-loaded with select voice messages but can be easily overwritten
- Up to 95dB sound output at 1m
- IP54 rating for dust and water resistance
- NPN compatible

(only 24V)

Simple message registration with various tools

Sound Playback Mode

Select various playback modes based on their application.

A	Bit input mode	Plays back up to 5 messages using Channels 1 to 5.	F	Playback mode prioritizing binary input and subsequent input	Plays back up to 31 messages using Channels 1 to 5. If a message input occurs during playback of another message, the message will stop and allow the input message to play back.
B	Binary input mode	Plays back up to 31 messages using Channels 1 to 5.	G	Bit input and hold playback mode	Plays back up to 5 messages using Channels 1 to 5. As long as the input is held on, the message is played back, once the input is removed, the message playback stops.
C	Bit input and sound reduction mode	Plays back up to 4 messages using Channels 1 to 4. When Channel 5 receives an input, the volume is reduced by about -15dB.	H	Binary input and hold playback mode	Plays back up to 31 messages using Channels 1 to 5. As long as the input is held on, the message is played back, once the input is removed, the message playback stops.
D	Binary input and sound reduction mode	Plays back up to 15 messages using Channels 1 to 4. When Channel 5 receives an input, the volume is reduced by about -15dB.	I	Test mode	Plays back Message No. 1
E	Playback mode prioritizing bit input and subsequent input	Plays back up to 5 messages using Channels 1 to 5. If a message input occurs during playback of another message, the message will stop and allow the input message to play back.			

Specification

Model	Rated Voltage	Operating Voltage Range	Maximum Power Consumption	Sound Pressure Level	Audio File	Operating Temperature Range	Maximum Seconds of Playback	Playback Channel	Protection Rating	Mass
BKV-31JF	12-24V DC	10.8 - 26.4V DC	9W	Maximum 95 dB (at 1m)	MPEG1-Audio Layer III (MP3) Standard bitrate : 64kbit/s, Fs=44.1kHz	-10°C to +50°C (humidity 85% or less)	63 s	5 (bit input) 31 (binary input)	IP54 (Mount on forward-facing panel) Front only	0.35kg
BKV-31KF	100V AC	100V AC±10%	10W							0.53kg
BKV-31QF	220V AC	220V AC±10%	10W							0.53kg

(Note) The indicated sound pressure level is the maximum volume (synthesized sound type: sine wave (1KHz)) and the actual level may be lower than the indicated sound pressure level due to message content, tone, and voltage fluctuations.

*When using multiple units, there may be variation in the playback sound even when started simultaneously with the tone and voice. This product is not for mounting on a vehicle.

EHS/EHV

Simple message registration with various tools

- M3 specifications have achieved anti-vibration 7G and passed vibration testing standards for automobile parts <JIS D 1601-1995, types 3 and B> by attaching anti-vibration rubber.
- 4 operation modes can be selected. (EHS type has Hold Playback only)

The EH Series features programmable voice signaling, high vibration resistance, and a high sound output of 110dB, designed to be heard above machine noise.

- Vibration resistant up to 4.5G, ideal for moving vehicles
- Comes pre-loaded with tone and alarm sounds
- Up to 110dB sound output at 1m
- IP65 rating for dust and water resistance
- Built-in sound reduction feature for quieter environments
- NPN/PNP compatible

FV-127JP

Simple message registration with various tools

The FV Series circuit board is designed to add audible or voice message playback to various types of machinery. It can be installed inside or on the rear of a machine for a more streamlined design.

- Installs seamlessly on the inside of machinery
- Up to 240 minutes total playback time
- Audio files can be registered to 127 available channels
- Built-in sound reduction feature
- Built-in terminal block for easy wiring
- Speaker output included in the terminal

Specification

LKEH

Voice type LKEH-FV

- 63-second (at 64kbits/s) playback capacity with 5 channels with bit input or 31 channels with binary
- Field programmable with an SD card (SDV-2GP recommended, sold separately)
- SD card can be used to freely arrange messages in groups
- Easily accessible DIP switch to select binary or bit input and testing recorded messages

Colors	Red, Amber, Green, Blue, White
Globe	Uses shock-resistant polycarbonate resin.

The LKEH Series features a 100mm diameter signal tower, programmable voice signaling, with a 105dB horn for highly effective signaling.

- Ultra-bright, maintenance-free LEDs
- Up to 105dB sound output at 1m
- Vibration resistant up to 2G
- Message capacity up to 64 seconds with 5 channel bit input or 31 channel binary input
- IP53 protection rating
- Built-in sound reduction feature for quieter environments
- NPN/PNP compatible

Sound type LKEH-F□

- 32 built-in sounds where 8 can be accessed with bit input and 32 with binary
- SD card can be used to freely arrange sounds into groups (SDV-2GP recommended, sold separately)
- Easily accessible DIP switch to select binary or bit input and testing built-in sounds

Table of tones (sound type LKEH-F□)

Type A			
Beep	Stutter	Bell	Yelp
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter & Bell	Synthesized Melody	Chime	Call Sign
Fur Elise	A Maiden's Prayer	Minuet in Gmjr	Annie Laurie

Optional Parts	Model
Wallmount Bracket	SZ-023
Wallmount Bracket	SZ-008
SD card (2GB)	SDV-2GP

The following custom specifications are available.
• PNP open collector specifications

Specifications

Colors not listed in stock products, and any products other than stock products are made-to-order.

LKEH-FV specifications

(Number of flashes...about 60/min)											
	Model	Rated Voltage	Operating Voltage Range	Number of tiers	Power Consumption	Sound Pressure Level	Audio File	Operating temperature range	Maximum Seconds of Playback	Number of messages	Mass
Voice type	LKEH-102FV	24V DC	24V DC±10%	1	10.6W	Maximum 105 dB (at 1m)	MPEG1-AudioLayer III (MP3)Standard bitrate : 64kbit/s, Fs=44.1kHz	-10°C to +50°C (humidity 85% or less)	63 s	5 (bit input) 31(binary input)	1.4kg
	LKEH-202FV			2	12.4W						1.6kg
	LKEH-302FV			3	14.2W						1.8kg
	LKEH-402FV			4	16.0W						2.0kg
	LKEH-110FV	100V AC	100V AC±10%	1	17W						2.1kg
	LKEH-210FV			2	20W						2.3kg
	LKEH-310FV			3	23W						2.5kg
	LKEH-410FV			4	26W						2.7kg
	LKEH-120FV	220V AC	220V AC±10%	1	17W						2.1kg
	LKEH-220FV			2	20W						2.3kg
	LKEH-320FV			3	23W						2.5kg
	LKEH-420FV			4	26W						2.7kg

(Note) The indicated sound pressure level is the maximum volume (synthetic sound type: sine wave (1KHz)) and the actual level may be lower than the indicated sound pressure level due to message content, tone, and voltage fluctuations.*When using multiple units, there may be variation in the playback sound even when started simultaneously with the tone and voice. This product is not for mounting on a vehicle.

LKEH-FVUL specifications (UL certified model)

(Number of flashes...about 60/min)											
	Model	Rated Voltage	Operating Voltage Range	Number of tiers	Power Consumption	Sound Pressure Level	Audio File	Operating temperature range	Maximum Seconds of Playback	Number of messages	Mass
Voice type	LKEH-102FVUL	24V DC	24V DC±10%	1	10.6W	Maximum 105 dB (at 1m)	MPEG1-AudioLayer III (MP3)Standard bitrate : 64kbit/s, Fs=44.1kHz	-10°C to +50°C (humidity 85% or less)	63 s	5 (bit input) 31 (binary input)	1.4kg
	LKEH-202FVUL			2	12.4W						1.6kg

Installation Dimension Drawings

Wiring Diagram

LKEH-FV type

●Use a normally closed contact circuit such as a relay switch, or an open collector circuit (NPN type) for the external contact on the signal wire. See the table below for circuit and contact capacity.

Model	Rated Voltage	Inrush current *4	Fuse capacity *5
LKEH-□02FV	24V DC	10A	2A (normal)
LKEH-□10FV	100V AC	12A	0.5A (time lag)
LKEH-□20FV	220V AC	6A	0.5A (normal)

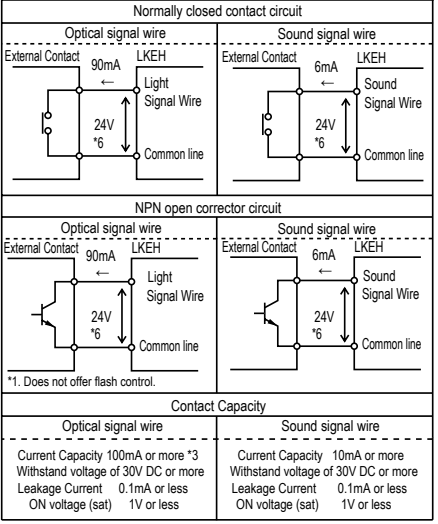

*Do not apply voltage to each wire. This may damage the product.

- *1. Flashing control is for non-voltage contact circuit applications only.
- *2. For the LKEH- □ 02FV, connect the Power Supply (Black) to the negative terminal. For the LKEH- □ 02UL (UL Standard), connect to a Class 2 power supply.
- *3. Indicates the rated contact capacity per LED light unit.
- *4. Rated at maximum operating voltage when power is first switched on.
- *5. Use a slow-blow fuse for the LKEH- □ 10FV. If a fast-blow type is used, there is a risk of blowing the fuse from the inrush current.
- *6. Indicates the supply voltage of the LKEH-□02FV.

- When using multiple units, there may be variation in voice playback and flash cycle even when the power supply or signal wire is entered simultaneously.
- Do not short circuit the sound and signal light wire together to the flash common wire. Sound and voice will not play properly.
- Do not connect the common wire to the flash common wire. The signal light unit will stop flashing normally.

LKEH-F□type

●Use a normally closed contact circuit such as a relay switch, or an open collector circuit (NPN type) for the external contact on the signal wire. See the table below for circuit and contact capacity.

Model	Rated Voltage	Inrush current *4	Fuse capacity *5
LKEH-□02	24V DC	10A	2A (normal)
LKEH-□10	100V AC	12A	0.5A (time lag)
LKEH-□20	220V AC	6A	0.5A (normal)

*Do not apply voltage to each wire. This may damage the product.

- *1. Flashing control is for non-voltage contact circuit applications only.
- *2. For the LKEH- □ 02, connect the Power Supply (Black) to the negative terminal. For the LKEH- □ 02UL (UL Standard), connect to a Class 2 power supply.
- *3. Indicates the rated contact capacity per LED light unit.
- *4. Rated at maximum operating voltage when power is first switched on.
- *5. Use a slow-blow fuse for the LKEH- □ 10. If a fast-blow type is used, there is a risk of blowing the fuse from the inrush current.
- *6. Indicates the supply voltage of the LKEH-□02.

- When using multiple units, there may be variation in toneplayback and flash cycle even when the power supply or signal wire is entered simultaneously.
- Do not short circuit the sound and signal light wire together to the flash common wire. Sound and voice will not play properly.
- Do not connect the common wire to the flash common wire. The signal light unit will stop flashing normally.

Simple message registration with various tools

Colors Red, Amber, Green, Blue

Globe Acrylic resin with superior weather resistance and translucency.

■RT-VF/VFUL

The RT-VF Series features a 162mm diameter rotating incandescent light, programmable voice signaling, with a 105dB horn for highly effective signaling.

- High weather resistance for outdoor use
- Up to 105dB sound output at 1m
- Message capacity up to 63 seconds with 5 channel bit input or 31 channel binary input
- IP65 rating for dust and water resistance
- Easily accessible volume control
- Comes in multiple voltages
- NPN compatible

RT-100VF, RT-200VF

Rated cross-sectional area : Wire type : Wire length
Power supply wire : 0.75mm² : VCTF : 320mm
Signal wire : 0.3mm² : CKVV : 300mm

Playback mode (-VF/-VFUL)

Select various playback modes based on their application.

A	Bit input mode	Plays back up to 4 messages using Channels 1 to 4.
B	Binary input mode	Plays back up to 15 messages using Channels 1 to 4.
C	Bit input sound reduction mode	Plays back up to 3 messages using Channels 1 to 3. When Channel 4 receives an input, the volume is reduced by about -10dB.
D	Binary input sound reduction mode	Plays back up to 7 messages using Channels 1 to 3. When Channel 4 receives an input, the volume is reduced by about -10dB.
E	Playback prioritizing bit input subsequent input Mode	Plays back up to 7 messages using Channels 1 to 3. If a message input occurs during playback of another message, the message will stop and allow the input message to play back.
F	Playback mode prioritizing binary input subsequent input	Plays back up to 15 messages using Channels 1 to 4. If a message input occurs during playback of another message, the message will stop and allow the input message to play back.
G	Bit input hold playback mode	Plays back up to 4 messages using Channels 1 to 4. As long as the input continues, the message keeps playing. Once the input is removed, the message playback stops.*
H	Binary input hold playback mode	Plays back up to 15 messages using Channels 1 to 4. As long as the input continues, the message keeps playing. Once the input is removed, the message playback stops.*
I	Test mode	Plays back Message No. 1

Colors Red, Amber, Green, Blue

Globe Uses acrylic resin with superior weather resistance and translucency.

The KJT Series features an 116mm width, a 90dB audible alarm, and comes in multiple voltages.

- Incandescent bulb light source type
- Up to 90dB audible alarm at 1m
- Easily accessible volume control
- Modular design for field customizing
- NPN compatible

*1 sound pressure maximum values: 24V models: 90dB (at 1m); 100V, 200V models 85dB (at 1m). Sound pressure values change, based on tones and surrounding environment.

Table of tones

32 Built-in Tones.

Every unit has 32 tones built-in.

Four built-in variations include RFT-A, RFT-C, RFT-D and RFT-E.

Type A

Beep	Stutter	Bell	Yelp
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter & Bell	Synthesized Melody	Chime	Call Sign
Fur Elise	A Maiden's Prayer	Minuet in Gmjr	Annie Laurie
London bridge is falling down	Holdiridia	Mary had a little Lamb	Camptown Races
Cuckoo Song	Village Blacksmith	On the Avignon Bridge	Daydream Believer
Amaryllis	Mozart Symphony No.40	Quiet Lakeside	Mountain Musician
Spanish Romance	Katyusha	Grandfather's Clock	Ave Maria

Type C

Beep	Stutter	Bell	Yelp
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter & Bell	Synthesized Melody	Chime	Call Sign
Can't take my eyes off of You	Top of the World	The Entertainer	Amazing Grace
Maiden with the flaxen hair	Aux Champs-Elysees	Canon	La-la Sunshine
Space Battleship Yamato	Oshiete	Makenai de	Theme Song
I Don't Want to Miss a Thing	Yozora no Mukou	Ai wa Katsu	Truth
Guts Daze!!	Odoru Ponpokorin	Ima sugu Kiss Me	Haru yo, Koi

Type D

Beep	Stutter	Bell	Yelp
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Runner	Mamotte Agetai	Chime	Call Sign
While listening to Olivia	September	Douyobi no Koibito	Aki no Kihai
Surf Tengoku, Ski Tengoku	Iro, White Blend	Happy Birthday	Hi Ho
I've been working on the Railroad	The Bear Song	Toys Go Cha-Cha-Cha	Konnako Irukana
Shubert's Lullaby	Rudolph the Red-nosed Reindeer	She Wore a Yellow Ribbon	My Darling Clementine
Yellow Rose of Texas	Yankee Doodle	When the Saints Go Marching In	Londonderry Aire

Type E

Beep	Stutter	Bell	Yelp
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter & Bell	Synthesized Melody	Chime	Call Sign
Bee-boh sound	Galloping Hi-Lo	Alien Chatter	Falling Crystals
Inverted Reveille x3	Galactic Motor	Ringling Phone	Two Tone
Alarm Clock	Ringling Hi-Lo	Fur Elise	Minuet in Gmjr
Annie Laurie	London bridge is falling down	Mary had a little Lamb	Camptown Races
Amaryllis	Mozart Symphony No.40	Ave Maria	Grandfather's Clock

Use of Copyrighted Material

PATLITE Corporation has not applied for permission to use certain copyrighted music or songs recorded for Type-A, Type-C and Type-D melody charts outside of Japan. Therefore, please contact the local copyright association for permission before using the product in case this product is used outside of Japan. Melody chart Type-E is recommended for use outside of Japan as this playlist does not include copyrighted music or songs, and permission is not required.

●Bit input →8 sound playback (See instruction manual for 8 sound grouping) Binary input →32 sound playback

●Alarm tones are denoted in characters for convenience. Please inquire about actual tones or check our website for more details.

Shows Shadows and Light

Virtual midday sunlight color remarkably distinguishes shadows and edges. It's suitable for use with detailed lighting or lighting up displays.

Yellow Ring Reduction (CLK)

The new PATLITE "micro-array lens" is designed to even-out light refraction, reduce unevenness and "Yellow Ring", a bad influence on lighting.

○Microarray lens

Daylight

The daylight color is the color temperature close to the sunlight at noon, and it is suitable for identifying shapes, precision work and inspection for research applications. (Approximately equivalent to a D65 light source)

□ White spectrum inside the white line
The natural white general spectrum

- IP6X= The product is placed in a dust chamber with a negative pressure state so that dust is made to float for 8 hours, and there is no invasion inside.
- IPX6= A water nozzle with a diameter of 12.0mm is placed at a range from 2.5 to 3.0 meters with a water velocity of 100 litres per minute injected towards the test piece in an omni-direction for three minutes or more without being affected by any harmful influences.
- IPXXG= The outline of the product is submerged at a distance of 1m from the bottom of a tank, and it is held submerged for 30 minutes. A non-water soluble N3 class No. 8 as specified in JIS K2241 (for coolants) is dropped on top of the upper part of a product at a rate of 0.5L/h for 48 hours.
- IPX9K= IPX9K is the German DIN 40050 PART9 standard. It is defined as a protection regulation for high temperature and high-pressurized water. Water is heated up to 80 °C and sprayed at a water pressure in the range from 80 to 100 BARs at 14 to 16 liters per minute at the test object. The test object is at a distance of 100 to 150 mm from the nozzle and sprayed in all directions at 0, 30, 60, and 90 degrees, then sprayed at a horizontal angle while it is being rotated, all done for a period of 30 seconds without being affected by water penetration.

Tough aluminum materials and stainless steel body

Aluminum specifications (CLK-AG)

Stainless steel specifications (CLK-SG)

- Compliant with 3 different protection ratings; IP66 and 67G (JIS C0920:2003) and IP 69K (DIN 40050 part 9) in waterproof performance for the demand which needs 80 °C underpressure hot water washing in the field for meat / food processing, medicine manufacturing and beverage industries.
 - Product lineup of four types with three different sizes (200-600 mm), 2 colors (Daylight, Natural White), Main Unit selection of material, and the type of cable connection. It can adapt to various scenes.
 - The operating temperature limit of -40 to +60 °C allows the possibility for installation in a sub-freezing temperature environment, such as a cold storage warehouse.
 - Corresponds to Europe's RoHS Directive.
 - CE Marking Compliant
 - UL Listed (File No.E306141) for Cable and aluminium body
 - UL Recognized Component (File No.E306141) for M12 connector / M12 link and aluminium body
- *Water-proof and oil resistance varies according to the model.

The CLA Series is built for use in high-pressure, high-temperature cleaning and sub-zero environments. The rugged polycarbonate construction means there is no glass or other contamination to be concerned about. Its various lengths allow it to be used in small and large areas and the daylight color temperature enables objects to be seen clearly.

- First in industry (based on self investigation) IP66, IP67 and IP69K rated LED work light
- Ideal for use in wet or high-pressure, high-temperature applications in food processing, beverage, and pharmaceutical industries.
- 34% less heat generated compared to 20W fluorescent lights, thus keeping the work environment cooler.
- Ultra-bright, maintenance-free LEDs

CWA

The CWA Series slim LED light bar is an affordable replacement for conventional fluorescent lamps. It outperforms them in several ways and has an IP65 rating which allows installation in most common environments. Bright, long-lasting LEDs (40,000 hrs. to 70% of original brightness) greatly reduce maintenance costs.

- 24V DC rated voltage
- -30°C to +60°C operating temperature range
- 6500K LED color temperature - Daylight white

Highly reliable LED chips are used

High-definition LED chip

The highly reliable LED chip, which is the core of LED lighting, has nearly 10 times (about 40,000 hours) the lifespan (based on LED brightness of 70%) in comparison to the common fluorescent light, it also does not contain any mercury.

A uniform light that subdues glare

In comparison to an LED luminous source, we take advantage of the straight beam optical characteristic of the LED without dropping brightness or overdoing it, but reproducing a natural light.

[Enforced]

There is no protection rating for the area surrounding the tip of the cable. To ensure insulation of water intrusion, the use of fillers (such as silicon, etc.) to plug up the tip part is recommended.

CLK2S-24AG-CD

*UL standards are AG (aluminum) specifications only

The CLK Series was designed especially for the machine tool industry where oil, oil mist, other cutting fluids and debris is constantly present (rated IP66G and IP67G). It has the lowest, space saving profile in the industry but puts out up to 2100 lx, illuminating large areas. The aluminum or stainless steel body and tempered glass protect the unit from hot flying debris. Various lengths are available along with the capability to daisy link them so that the CLK can be used in various equipment sizes.

A stainless steel with acrylic lens unit that is rated IP69K is also available for the food, beverage and pharmaceutical industries where high-pressure and high-temperature wash down is required.

- Cable or M12 connection methods
- 24V DC rated voltage
- -30o to +60oC operating temperature range

- IP6X= The product is placed in a dust chamber with a negative pressure state so
- IPX6= that dust is made to float for 8 hours, and there is no invasion inside. A water nozzle with a diameter of 12.0mm is placed at a range from 2.5 to
- IPX7= 3.0 meters with a water velocity of 100 litres per minute injected towards the
- IPXXG= test piece in an omni-direction for three minutes or more without being affected by any harmful influences.
- IPX9K= The outline of the product is submerged at a distance of 1m from the bottom of a tank, and it is held submerged for 30 minutes. A non-water soluble N3 class No. 8 as specified in JIS K2241 (for coolants) is dropped on top of the upper part of a product at a rate of 0.5L/h for 48 hours. IPX9K is the German DIN 40050 PART9 standard. It is defined as a protection regulation for high temperature and high-pressurized water. Water is heated up to 80 and sprayed at a water pressure in the range from 80 to 100 BARs at 14 to 16 liters per minute at the test object. The test object is at a distance of 100 to 150 mm from the nozzle and sprayed in all directions at 0, 30, 60, and 90 degrees, then sprayed at a horizontal angle while it is being rotated, all done for a period of 30 seconds without being affected by water penetration.

Passed dust-proof, water resistance, and oil-proof tests listed below:.

Oil proof test

The product has passed the oil-proof test in the following cutting oils!

Diluted 20 times in the following oils and soaked at 55°C for 240 hours (10 days).

Name of company
Hangsterfer's
Yushiro Chemical Industry Co., Ltd.
Castrol
Blaser Swisslube

Name of oil
Hangsterfer S500
Yushiroken Synthetic #663
Syntilo 9954
Blasocut BC35LFSW

Confirmation in result of swelling, contraction, dissolution, exfoliation, separation, cracks, and discoloration by the accelerated impregnation examination with the above-mentioned cutting fluid for diluted oil at 55 °C for 240 hours (for ten days) was made. Due to the additive agents in oil, the application of oils other than the ones above may influence physical properties, therefore, please investigate before purchasing.

Caution

If the cable tip component comes into contact with water or is in a low temperature environment, please waterproof and oil-proof the cable tip component.

CWK

These brackets are included.

Mounting Brackets

The CWK Series was designed especially for the machine tool industry where oil, oil mist, other cutting fluids and debris is constantly present (rated IP66G and IP67G). It has one of the lowest, space saving profiles in the industry but puts out up to 1500 lx, illuminating large areas. In addition to this, a specially designed lens disperses the light so a wider area is illuminated. The aluminum and tempered glass protect the unit from hot flying debris. Various lengths are available along so that the CWK can be used in various equipment sizes.

The body is protected by the tempered glass which disperses the flying debris.

Passed oil resistant test with commonly used cutting oils.
[Accelerated aging test with diluted oil at 55°C for 240 hours (10 days) sprayed onto the test object]

Wiring Diagram

There is no protection rating for the area surrounding the tip of the cable.
To ensure insulation of water intrusion, the use of fillers (such as silicon, etc.) to plug up the tip part is recommended.

Oil proof test

It has passed the oil resistant test from the following common cutting oils.

Company	Oil Type
Hangsterfer's	Hangsterfer's S-500
Yushiro Chemical Industry Co., Ltd.	Yushiroken Synthetic #663
Castrol	Syntilo 9954
BlaserSwisslube Inc.	Blasocut BC35LFSW

Confirmation in result of swelling, contraction, dissolution, exfoliation, separation, cracks, and discoloration by the accelerated impregnation examination with the oil types indicated in the table on the left for diluted oil at 55°C for 240 hours (ten days) was made.

Due to the additive agents in oil, the application of oils other than the ones mentioned may influence physical properties, therefore, please inquire in advance.

* The mentioned company names, product names, trademarks, etc. are the registered trademarks or trademarks in Japan for each company, and/or other countries.

Optional Parts

The following brackets can be used to fit various mounting applications.

Angle-adjustment Brackets

Tilt only
(T type)

Daylight color

Pan & Tilt
(PT type)

Daylight color

The CLN Series was designed especially for the machine tool industry where oil, oil mist, other cutting fluids and debris is constantly present (rated IP66G and IP67G). Its ability to pan and tilt allows operators to point the light where it's needed most. The aluminum body and tempered glass protect the unit from hot flying debris. The 6500K color temperature (daylight white) allow objects to be seen clearly.

Flexible Angle Adjustment

■ Tilt only (T type)

Can tilt 180° and can be folded to 33mm for easier installation.

■ Pan & Tilt (PT type)

Can tilt 180° or rotated 120° to fit any application. Can be folded to 43mm for easier installation.

Oil-Proof Test

Passed Oil-proof Test

Product was immersed in the oils listed below in 1:20 dilution at 55°C for 240 hours (10 days).

Company Name	Oil Name
Hangsterfer's	Hangsterfer S500
Yushiro Chemical Industry Co., Ltd.	Yushiroken Synthetic #663
Castrol	Syntilo 9954
Blaser Swisslube	Blasocut BC35LFSW

At the conclusion of each test the product was examined and it was confirmed that there was no swelling, contraction, dissolution, exfoliation, separation, cracks, discoloration, and penetration.

It is recommended that careful investigation be made before purchase since additive agents in oil may differ from those tested and may influence the physical properties of the product.

*Company names, product names, trademarks, etc. of those listed in the table are each company's registered trademarks in Japan or other countries.

Replacement Parts

●We stock parts that can be replaced by the customer as repair parts.

You can refer to the list of replacement or repair parts on our website by going to: www.patlite.com/

You can search for replacement or repair parts by going to our homepage and clicking on "Customer Support" and then scroll down to "Replacement Parts" on the menu.

Purchase from the retail store you purchased your product from, or contact your PATLITE sales representative for more information.

Information on discontinued models

For next generation models, you can go to our homepage and click on "Customer Support" and then scroll down to "Discontinued Products" on the menu.

If the information you are looking for is not found, contact your PATLITE sales representative for more information.

■ Next-generation models

Some compatibility between legacy and next-generation models may not have been kept for mounting structure, wiring, operating environment and power consumption

Refer to the catalog, product specifications, webpage and instruction manual for details on next-generation models.

■ Period to maintain support and repair part sales availability

Due to the unpredictable circumstances to maintain stock for consumption parts, please understand that the support period for the sale period of repair parts may be shortened due to the consumption of parts and procurement status.

Caution on long-term use

In general, products may experience safety-related issues such as aging degradation, insulation failures of electronic components and circuit boards, and smoke, fire, and electrification from products due to contact failures when using products for a long period of time.

In addition, products may experience problems such as deformation damage, water intrusion, and malfunction due to material degradation, such as resins, metals, and rubber parts.

While the product lifespan varies upon conditions such as frequency of use, environmental conditions, it is recommended to not use products for more than 10 years, unless specified in the product specifications or instruction manual.

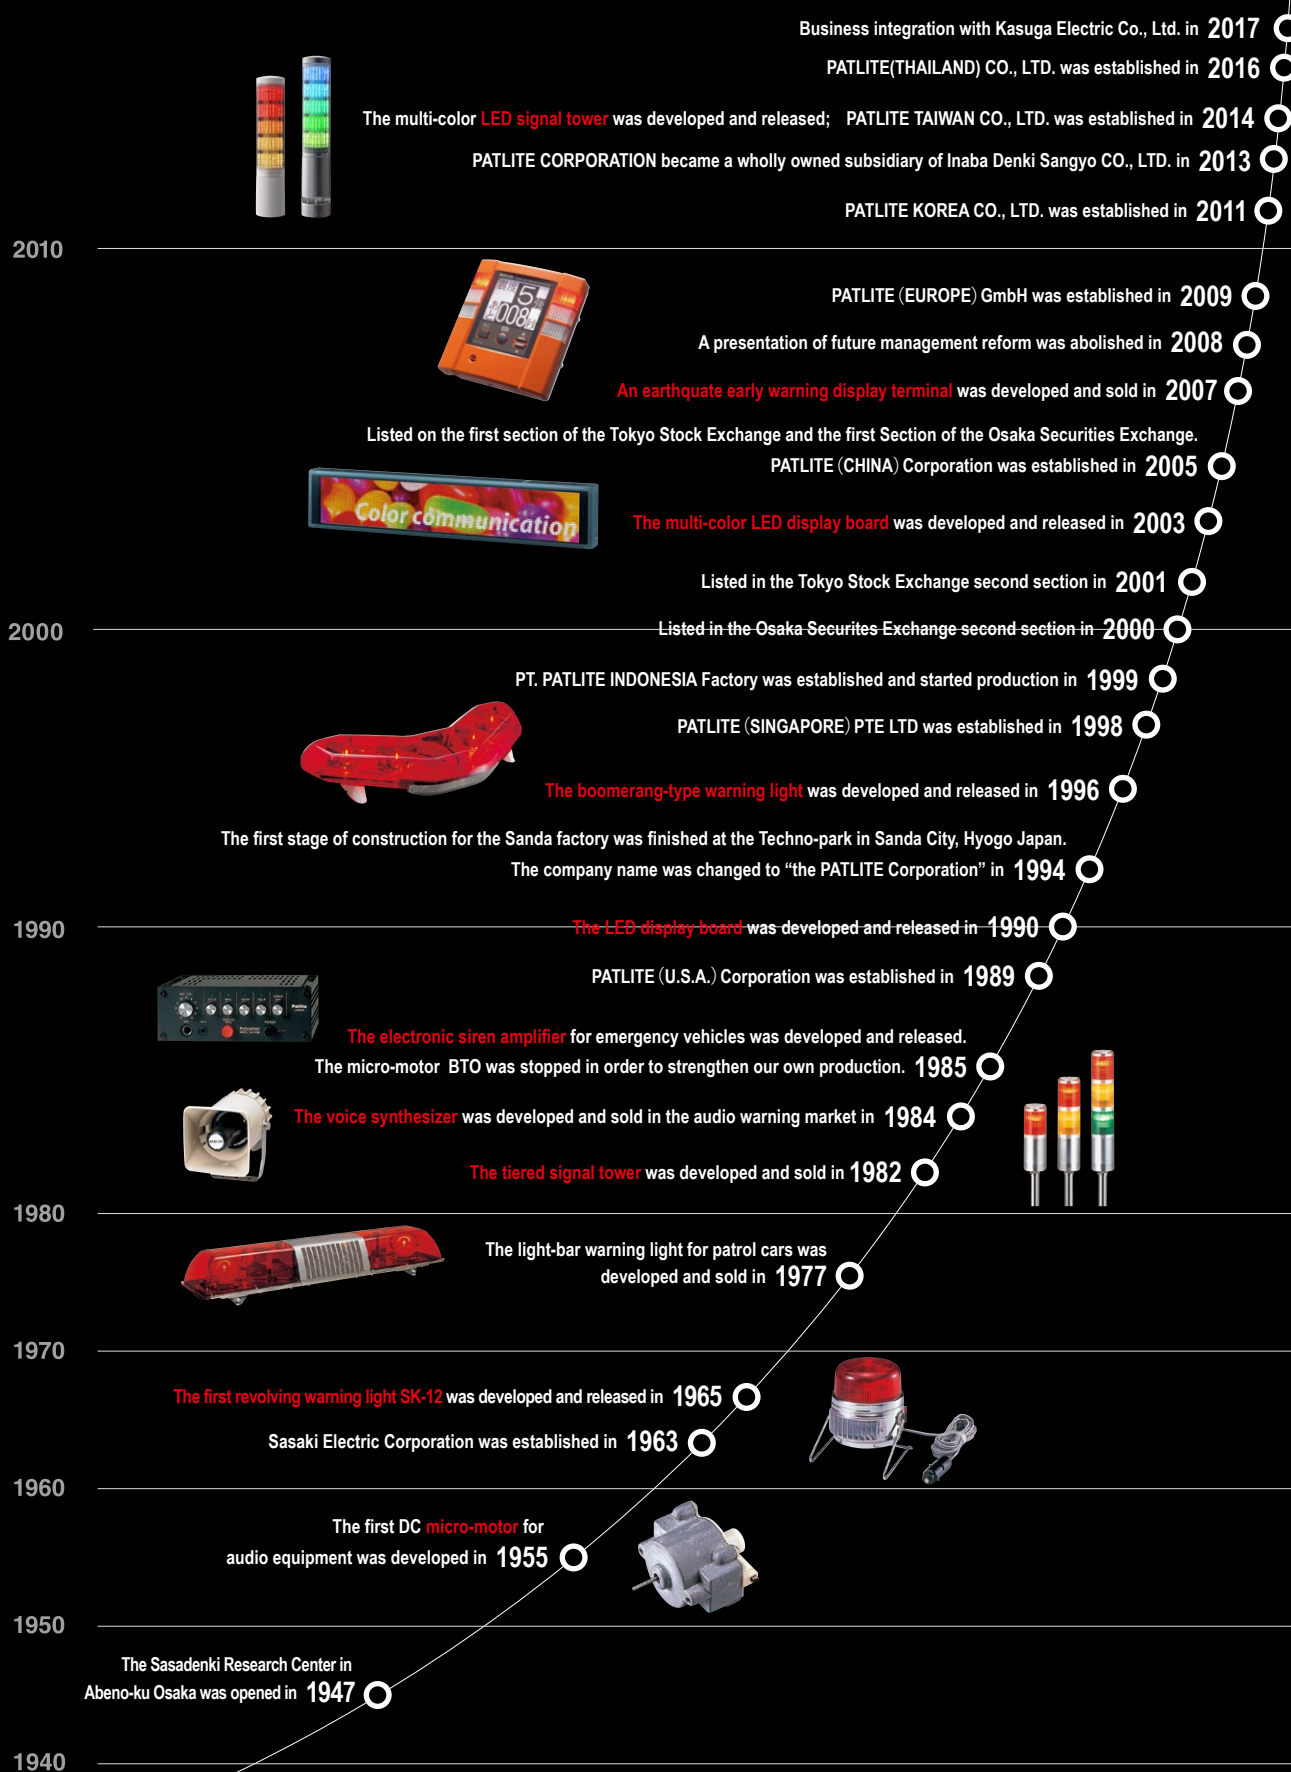

If the products are used in environments with vibration and shock, it may cause mounted products to come loose, become damaged from falling or may lead to injury to the customer.

Be sure to regularly inspect the products at least one to two times per year that the mountings are tightly fastened and re-tighten them when necessary.

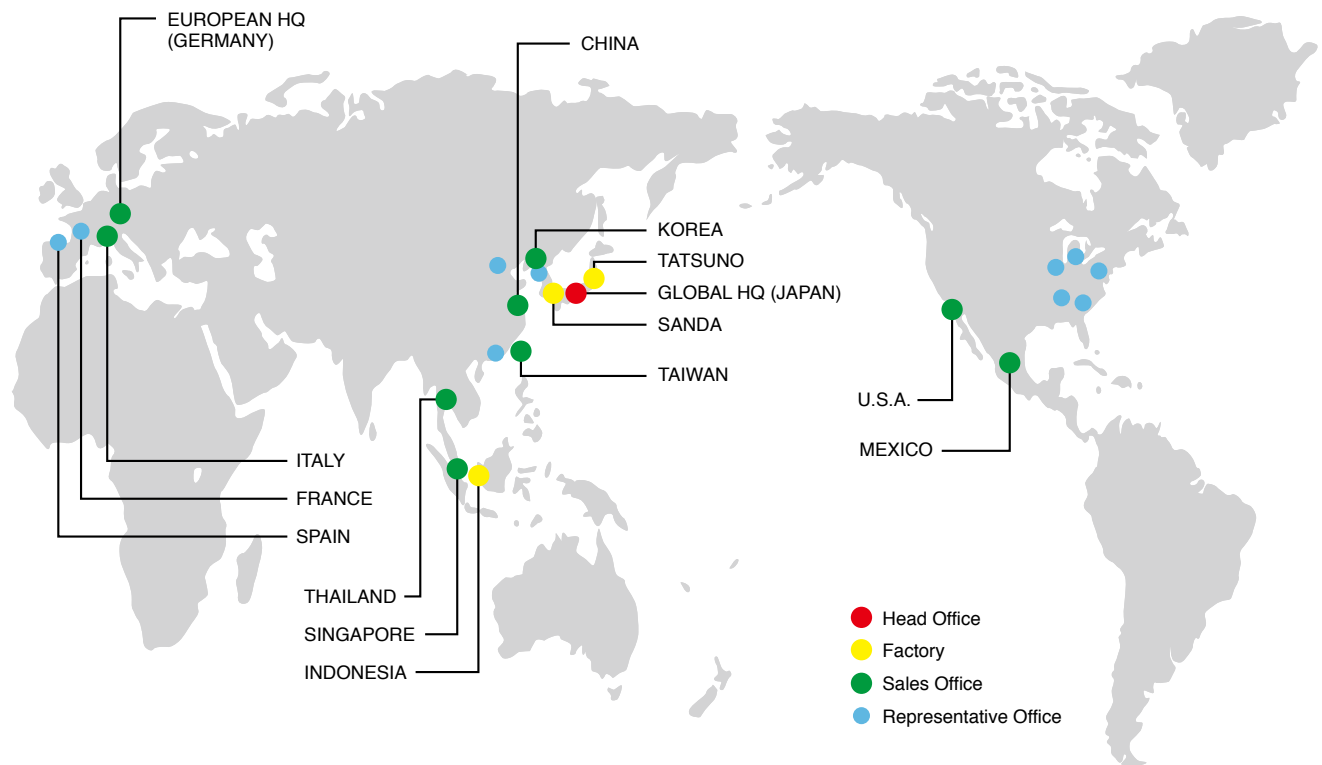

The lifespan of consumable parts (motors, light bulbs, rotor bushings, packing, O-rings, bearings and xenon boards, etc.) may vary based on their environment.

History of PATLITE

KASUGA Electric was merged with the PATLITE CORPORATION. 2017
